Re: ENVIRONMENTAL FINDINGS REPORT
CORRIDOR ENVIRONMENTAL SITE ASSESSMENT
NORTH AND WEST BATTERY PARK CITY RESILIENCY PROJECT
NEW YORK, NEW YORK
MATRIX NO. 20-1152

Dear Garrett:

Matrix New World Engineering (Matrix) is pleased to present this Environmental Findings Report for the above-referenced site.

This report summarizes the findings of the site reconnaissance, the review of historic and current uses of the site to identify contamination by hazardous substances or waste, the review of governmental databases and the review of other pertinent data. No sampling or laboratory analysis of any media was performed as part of this report. As a result of this assessment, two (2) Recognized Environmental Conditions (RECs) were identified in connection with the site.

If you have any questions regarding the information contained in this report, please contact us at (973) 240-1800.

Sincerely,

Mindy Chassin Horowitz

Mindy Chassin Horowitz
Program Director

EXECUTIVE SUMMARY

Subject to the qualifications and limitations stated in Section 1 of this report, Matrix New World Engineering, Land Surveying, and Landscape Architecture, P.C. (Matrix) was retained by AECOM USA, Inc. (AECOM) on behalf of the Battery Park City Authority (BPCA) (also known as "Users" together with AECOM) to perform a Corridor Environmental Site Assessment (ESA) as part of a due diligence evaluation in connection with the proposed project, which will provide risk reduction for Battery Park City and its residents.

The North/West Battery Park City Resiliency Project contemplates the creation of an integrated coastal flood risk management system from First Place, north along the Battery Park City Esplanade, across to the east side of West Street/Route 9A, and terminate above Chambers Street at a high point on Greenwich Street.

The study area for this Corridor ESA crosses through and/or borders the following tax blocks and lots:

- Block 16: Lots 3, 12, 15, 20, 45, 65, 90, 95, 100, 125, 210, 215
- Block 142: Lots 25, 50
- Block 184: Lot 2

To provide more focused discussions of environmental findings along the North and West Alignments, this report has broken down each alignment into the following sections:

- North Alignment:
    - N. Moore Street: located between West Street and Greenwich Street.
    - West Street: located between N Moore Street and the North Esplanade
    - North Esplanade: located between West Street/9A and the intersection of River Terrace and Chambers Street
- West Alignment:
    - Rockefeller Park: located along River Terrace between Chambers Street and Belvedere Plaza.
    - Belvedere Plaza and North Cove: located along the BPC Esplanade from the north side of Belvedere Plaza to the north side of Esplanade Plaza.
    - BPC Esplanade Mid-Section: located on the inland side of the BPC Esplanade from the north side of Esplanade Plaza to 3rd Place.
    - South Cove: Directly adjoining the buildings on the BPC Esplanade between 3rd Place and 1st Place.

A regional location map included as **Figure 1** and a site plan is included as **Figure 2**.

The Corridor ESA described in this report was performed in general accordance with the scope and limitations of the ASTM International (ASTM) E1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E1527-13 Phase I Standard). As the Site is irregularly shaped and over 1-mile long, the study area was limited to what falls within a 100-foot radius of the site. Limiting conditions and/or deviations from the ASTM E1527-13 Phase I Standard are described in Sections 1.3, 5.1 and 7.4 of this report, as applicable.

Site Feature	Description
Approximate Site size:	1.38 miles long
Current Site operator:	BPCA
Site use:	Recreational outdoor space; public facilities; and residential, commercial/ office, and mixed-use buildings.
Buildings (stories):	Multi-story buildings adjoin the full alignment including residential, commercial/office, and mixed-use.
Exterior areas:	Public roadways, Hudson River Park, North Esplanade, Rockefeller Park, Belvedere Plaza, North Cove marina, Battery Park City Esplanade, South Cove Park.
On-site roads/rail lines:	N. Moore Street, Route 9A/West Street, River Terrace, North End Avenue, Battery Park City Esplanade, 3rd Place, 1st Place. The BPC Shoreline, and much of the esplanade area, are built upon platforms constructed over the Hudson River instead of directly on land. The Belvedere Plaza and North Cove section, BPC Esplanade Mid-Section, and South Cove section are located on and/or adjoining the platform areas.
Other large equipment:	Barges adjoining South Cove section, appearing to temporarily facilitate construction activities.

As a result of the Corridor ESA, including but not limited to our visual observation of the Site; review of historical information, environmental databases, and information provided by the Users; interviews with current Site representative(s); and Matrix's professional judgment, the following *recognized environmental conditions* (RECs), *controlled recognized environmental conditions* (CRECs), and/or *historical recognized environmental conditions* (HRECs) associated with the Site, as defined by the ASTM E1527-13 Phase I Standard (see Section 1.1 of the report), were identified:

Recognized Environmental Conditions (RECs)

REC No. 1: Historic Fill (site wide)

According to the aerial photographs, topographic maps and Sanborn maps provided by EDR, it is apparent that the entire West Alignment has been filled in between the years 1967 and 1992, as the area was reclaimed coastline, expanded into the Hudson River. Further, the North Alignment was likely also filled at some point in its development, as coastal and low-lying areas of the city were most often filled or graded. Historic fill in New York City typically is characterized by contaminated soil and groundwater including heavy metals, semi-volatile organic compounds (SVOCs), pesticides, and polychlorinated biphenyls (PCBs). The potential exists for contamination to be present on-Site.

REC No. 2: Current and Historical Dry-Cleaning Facilities

2A: Current Dry-Cleaning Facilities

- Liberty Cleaners – 225 South End Avenue
- Four Seasons Dry Cleaning – 21 South End Avenue
- South Cove Cleaner – 2 South End Avenue

2B: Former Dry-Cleaning Facilities

- REDCAP 1 Inc – 22 River Terrace
- Kim Cleaners – 370 Greenwich Street
- Trio Cleaners – 395 Greenwich Street
- Golden Cleaners – 111 Hudson Street
- Independent Plaza Cleaners – 34 Harrison Street
- Greenwich Cleaners – 331 Greenwich Street
- Gateway Cleaners/Ginos Battery Park Cleaners – 325 South End Avenue
- Elite French Cleaners – 245 South End Avenue
- Fresh Cleaners – 300 Rector Place

According to the radius report provided by EDR, several historical and current dry-cleaning facilities were identified either on-Site, adjacent to the Site, or in close proximity and upgradient of the Site. Historical and current dry-cleaning facilities may have released solvents used in the dry-cleaning process into the soil and groundwater. The potential exists for the contamination to be present on-Site due to historical on-Site dry-cleaning facilities as well as migration onto the Site from adjacent and nearby facilities.

Controlled Recognized Environmental Conditions (CRECs)

No known or suspected CRECs in connection with the Site were identified during this Corridor ESA.

Historical Recognized Environmental Conditions (HRECs)

No known or suspected HRECs in connection with the Site were identified during this Corridor ESA.

Pursuant to the ASTM E1527-13 Phase I Standard, a data gap is defined as *a lack of or inability to obtain information required by [the ASTM E1527-13 Phase I Standard] despite good faith efforts by the environmental professional (EP) to gather such information*. Pursuant to the ASTM E1527-13 Phase I Standard, *the report shall identify and comment on significant data gaps that affect the ability of the EP to identify RECs and identify the sources of information that were consulted to address the data gaps. A data gap is only significant if other information and/or professional experience raises reasonable concerns involving the data gap*. The term "significant data gap" does not necessarily imply that the relative liability or potential financial risk of the concern is significant. In addition to the above-listed RECs no *significant* data gaps were noted.

Other Findings:

The term "other finding" is not defined by ASTM; rather, Matrix uses the term to connote areas of contingent risk that are not clearly defined by the ASTM Standard. The following other findings were identified as part of this Corridor ESA.

Historical Auto Repair Garages:

- *Auto Repair Garage at 211 West Street:* Observed on the 1950 Sanborn map adjoining the West Street section with a potential gasoline storage tank. The garage was demolished and replaced with the Borough of Manhattan Community College (BMCC) campus by 1981. No spills or violations are associated with this facility. Based on that extensive redevelopment, this former garage is not considered a REC.
- *Garage with PBS Tanks at 68 North Moore Street:* Observed on the 1950 through 1988 Sanborn maps adjoining the N. Moore Street section. The garage was demolished and a vacant lot through the 1990s, a parking lot through 2004, and was replaced by apartment buildings by 2005. No spills or violations are associated with this facility. Based on the most recent redevelopment, this former garage is not considered a REC.
- *Garage with four PBS tanks 56-62 North Moore Street:* Observed on the 1950 through 2005 Sanborn maps 240 feet east of the N. Moore Street section. The facility is still currently used as a parking facility; however, no other federal, state, or local records indicate the presence of

current or former PBS tanks. No spills or violations are associated with this facility. Because no additional records corroborate the PBS tanks included on the Sanborn maps, this garage is not considered a REC.

This Executive Summary is part of this complete report; any findings, opinions or conclusions in this Executive Summary are made in context with the complete report. Matrix recommends that the Users read the entire report for all supporting information related to findings, opinions, and conclusions.

With regard to third-party recipients of this document, Matrix does not (a) make any warranty, expressed or implied, with respect to the use of any information or methods disclosed in this document; or (b) assume any liability with respect to the use of any information or methods disclosed in this document. Any third-party recipient of this document, by its acceptance or use of this document, releases Matrix from any liability for direct, indirect, economic, incidental, consequential, or special loss or damage whether arising in contract, warranty, express or implied, tort, or otherwise, and irrespective of fault, negligence, and strict liability.

This report is intended to be used in its entirety. No excerpts may be taken to be representative of the findings of this assessment.

1.0 INTRODUCTION

Matrix New World Engineering, Land Surveying, and Landscape Architecture, P.C. (Matrix) was retained by AECOM USA, Inc. (AECOM) on behalf of the Battery Park City Authority (BPCA) (also known as "Users" together with AECOM) to perform a Corridor Environmental Site Assessment (ESA) as part of a due diligence evaluation in connection with the proposed project, which will provide risk reduction for Battery Park City and its residents.

The North/West Battery Park City Resiliency Project contemplates the creation of an integrated coastal flood risk management system from First Place, north along the Battery Park City Esplanade, across to the east side of West Street/Route 9A, and terminate above Chambers Street at a high point on Greenwich Street.

The study area for this Corridor ESA crosses through and/or borders the following tax blocks and lots:

- Block 16: Lots 3, 12, 15, 20, 45, 65, 90, 95, 100, 125, 210, 215
- Block 142: Lots 25, 50
- Block 184: Lot 2

To provide more focused discussions of environmental findings along the North and West alignments, this report has broken down each alignment into the following sections:

- North Alignment:
    - N. Moore Street: located between West Street and Greenwich Street.
    - West Street: located between N Moore Street and the North Esplanade
    - North Esplanade: located between West Street/9A and the intersection of River Terrace and Chambers Street

- West Alignment:
    - Rockefeller Park: located along River Terrace between Chambers Street and Belvedere Plaza.
    - Belvedere Plaza and North Cove: located along the BPC Esplanade from the north side of Belvedere Plaza to the north side of Esplanade Plaza.
    - BPC Esplanade Mid-Section: located on the inland side of the BPC Esplanade from the north side of Esplanade Plaza to 3rd Place.
    - South Cove: Directly adjoining the buildings on the BPC Esplanade between 3rd Place and 1st Place.

A Site location map included as **Figure 1**.

This report was prepared for and may be relied upon by the Users for the purposes set forth herein; it may not be relied on by any party other than the Users and reliance may not be assigned without the express approval of Matrix. Authorization for third party reliance on this report will be considered by Matrix if requested by the Users. Matrix reserves the right to deny reliance on this report by third parties.

1.1 Purpose and Scope of Services

This Corridor ESA has been prepared by Matrix in general accordance with the ASTM International (ASTM) E1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E1527-13 Phase I Standard) and is intended for the sole use of the Users mentioned above. Standard environmental database search distances were modified to a 100-foot radius surrounding the Site corridor.

The purpose of this assessment is to identify *Recognized Environmental Conditions* (RECs) at the Site, as defined by the ASTM E1527-13 Phase I Standard, as follows:

> Recognized Environmental Conditions (RECs) are defined as the presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a *property*: (1) due to any *release* to the environment; (2) under conditions indicative of a *release* to the *environment*; or (3) under conditions that pose a *material threat* of a future *release* to the *environment*.
>
> Controlled Recognized Environmental Conditions (CRECs) are defined as a REC resulting from a past *release* of *hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (for example, *property* use restrictions, *activity and use limitations, institutional controls*, or *engineering controls*).
>
> Historical Recognized Environmental Conditions (HRECs) are defined as a past *release* of any *hazardous substances* or *petroleum products* that has occurred in connection with the *property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *property* to any required controls (for example, *property* use restrictions, *activity and use limitations, institutional controls*, or *engineering controls*).

De minimis conditions are defined as a condition that generally does not present a threat to human health or the *environment* and that generally would not be the subject of an enforcement action if brought to the

attention of appropriate governmental agencies. Conditions determined to be *de minimis conditions* are not RECs nor CRECs.

The term “other finding” is not defined by ASTM; rather, Matrix uses the term to connote areas of contingent risk that are not clearly defined by the ASTM Standard.

The Scope of Services for this Corridor ESA included the following tasks:

- Site and vicinity reconnaissance;
- Preparation of Site and vicinity description and physical setting summary;
- Historical source review and description of historical Site conditions;
- Review of environmental databases and regulatory agency records;
- Review of previous environmental reports/documentation, as applicable; and
- Preparation of a report summarizing findings, opinions, and conclusions.

Recommendations for an Environmental Site Investigation (ESI), including collection of environmental samples, will be provided to BPC in a separate workplan. Additionally, an evaluation of business environmental risks associated with a parcel of commercial real estate, as described in Sections 1.3 and 13 in the ASTM E1527-13 Phase I Standard, are not included in the scope of this Corridor report.

This review is not intended as legal advice, nor is it an exhaustive review of Site conditions or regulatory compliance.

1.2 Additional Services

Items outside the scope of the ASTM E1527-13 Phase I Standard and this Corridor ESA include, but are not limited to, the following:

- Asbestos-containing building materials
- Radon
- Lead-based paint
- Lead in drinking water
- Wetlands
- Regulatory compliance
- Cultural and historic resources
- Industrial hygiene
- Health and safety
- Ecological resources
- Endangered species
- Indoor air quality unrelated to *releases* of *hazardous substances* or *petroleum products* into the environment
- Biological agents
- Mold

Additional services, if performed, are discussed in Section 8.0.

1.3 Deviations to ASTM E1527-13 Phase I Standard

Notwithstanding additions to the ASTM E1527-13 Phase I Standard, as listed in Sections 1.2 and 8, if applicable, and limiting conditions, as listed in Section 5.1, if applicable, the following significant deviations or deletions to the ASTM E1527-13 Phase I Standard were made during this Corridor ESA:

- Standard environmental database search distances were modified to a 100-foot radius surrounding the Site corridor.
- Interviews with owners, operators, and/or occupants of the Site, and/or local officials were not conducted

2.0 SITE DESCRIPTION

2.1 Site Improvements and Use

Current Site information and on-Site improvements are listed in the following table. A Site plan is included as **Figure 2**.

Site Feature	Description
Approximate Site size:	1.38 miles long
Current Site operator:	BPCA
Site use:	Recreational outdoor space; public facilities; and residential, commercial/office, and mixed-use buildings.
Buildings (stories):	Multi-story buildings adjoin the full alignment including residential, commercial/office, and mixed-use.
Exterior areas:	Public roadways, Hudson River Park, North Esplanade, Rockefeller Park, Belvedere Plaza, North Cove marina, Battery Park City Esplanade, South Cove Park.
On-site roads/rail lines:	N. Moore Street, Route 9A/West Street, River Terrace, North End Avenue, Battery Park City Esplanade, 3rd Place, 1st Place. The BPC Shoreline, and much of the esplanade area, are built upon platforms constructed over the Hudson River instead of directly on land. The Belvedere Plaza and North Cove section, BPC Esplanade Mid-Section, and South Cove section are located on and/or adjoining the platform areas.
Other large equipment:	Barges adjoining South Cove section, appearing to temporarily facilitate construction activities.

The most current Site utility information is listed in the following table:

Utility Information		
Utility	**Source**	**Description**
Electricity Supplier	User provided documents	Consolidated Edison
Natural Gas Supplier	User provided documents	Consolidated Edison
Water Supplier	User provided documents	New York City Department of Environmental Protection (NYCDEP)
Sanitary Sewer	User provided documents	NYCDEP
Stormwater Sewer	User provided documents	NYCDEP

2.2 Physical Setting

Current information of the Site's physical setting is provided in the following table:

Physical Setting		
Conditions	**Source**	**Description**
Geography		
Geographic Coordinates	EDR database report, Google Earth	The North Alignment's northern-most extent is at 40°43'11.97"N, 74° 0'37.34"W, and traverses southwest to 40°43' 5.63"N, 74° 0' 53.95"W. The West Alignment's northern-most extent is at 40°43' 5.41"N, 74° 0' 54.71"W, and continues to its southern-most extent at 40°42' 23.63"N, 74° 1' 6.73"W.
Topography		
Elevation (above mean sea level)	USGS topographic map (Jersey City, NJ and Brooklyn, NY)	Approximately 1-10 feet above mean sea level (amsl)
Topographic Gradient	USGS topographic map (Jersey City, NJ and Brooklyn, NY)	On-Site topographic slopes gradually downward to the west. The regional topographic gradient is west.
Hydrology		
Surface Water Runoff	Visual observations	Runoff enters stormwater basins located along the surrounding streets, and overland flow discharges to the Hudson River.
Nearest Surface Water Body to the Site	Google Earth; Visual observations	The Hudson River adjoins the Site Corridor to the west.
Geology and Hydrogeology		
Presumed Direction of Shallow Groundwater Flow	USGS topographic map (Jersey City, NJ and Brooklyn, NY)	Based on the topographic gradient and the location of the nearest surface water body, shallow groundwater likely flows to the west.
Depth to Groundwater	EDR database report	Spill records for nearby properties measured groundwater at 13 feet below ground surface (bgs) (at 11 Hubert Street, 495 feet to the north) and at 12 feet bgs (at 225 Rector Place, 609 feet to the east).
On-site Wells	Visual observations	No wells observed on-Site.
Nearest Groundwater Supply Wells	EDR database report	There are no federally-registered public groundwater supply wells listed within a one-mile radius of the Site.
Geologic Conditions	Web Soil Survey*	The Site Corridor is made up of approximately 43.4% of Urban land-Laguardia complex (ULA), 39% Urban land, reclaimed substratum (UrA), 17% Laguardia-Urban land complex (LUA), and 0.6% of Urban land, tidal marsh substratum (UmA). All soil types for the Site Corridor are described as having 0 to 3% slopes.
Notes: * - https://websoilsurvey.sc.egov.usda.gov/App/WebSoilSurvey.aspx		

The database radius report supplied by Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut was reviewed to obtain information regarding the dominant soil composition in the Site vicinity and is included as **Appendix A**. Additional sources of information regarding geologic, hydrogeologic, hydrologic, or topographic characteristics of the Site, if reviewed, are listed in the table above or in Section 4.0 and are discussed in this report where applicable.

3.0 USER PROVIDED INFORMATION

According to the ASTM E1527-13 Phase I Standard, certain tasks that may help identify the presence of RECs associated with the Site are generally conducted by the Phase I ESA User(s). These tasks include: providing, or authorizing the *EP* to obtain, recorded land title records for environmental liens or activity and land use limitations (AULs); providing specialized knowledge related to RECs at the Site (e.g., information about previous ownership or environmental litigation); providing commonly known or *reasonably ascertainable* information within the local community about the Site that is material to RECs in connection with the Site; and informing the *EP* if, as believed by the Users, the purchase price of the Site is lower than the fair market value due to contamination. ASTM E1527-13 recommends an optional User Questionnaire be completed by the Users to assist the environmental professional in gathering such information as mentioned above. Due to the Site Corridor's location mainly within the public right-of-way and through several public and private properties, the information requested in User Questionnaires is not applicable to the scope of this project and was not requested.

4.0 RECORDS REVIEW

Information regarding Site and vicinity historical uses and releases, including RECs, as applicable, was obtained from various publicly available and practically reviewable sources including but not limited to aerial photographs; fire insurance maps; topographic maps; city directories; local municipal records; an environmental database report; property tax files; recorded land title records; building department records; zoning/land use records; previous environmental reports; other historical sources; and/or interviews with Site representative(s) and regulatory agency official(s), as necessary. Information from these sources is incorporated in this report, as applicable.

4.1 Database Report & Environmental Record Review

A database search report that identifies properties listed on state and federal databases within the ASTM-required radii of the Site capped at 100 feet was obtained from EDR and is included in **Appendix A**. The purpose of the regulatory file review is to obtain sufficient information to assist the *EP* in determining if a REC, CREC, HREC, and/or *de minimis* condition exists at the Site in connection with the listing. Pertinent and/or alternative regulatory files and/or records reviewed are listed in Section 4.1 and are summarized in Section 7, as applicable.

The environmental database search identified 1,173 listings of mapped properties including the Site and/or surrounding properties, plus 14 properties that could not be mapped (i.e., orphan properties).

4.1.1 Site Environmental Database Record Review

The following properties were identified within the Site boundaries. These listings are summarized below:

Address & Facility Name	Con Edison – V8224 1 New York Plaza (Broad & State)
Radius Map Number(s)	D4
Database(s)/ID No(s).	FINDS, ECHO: Registry ID 110017271646
Database Review Summary	The FINDS and ECHO databases linked to a USEPA Facility Detail Report which indicates the facility is a RCRA generator.
REC(s) identified:	Information in the databases does not suggest contamination, and there is limited potential to impact the Site.

Address & Facility Name	West Street and Hudson Street
Radius Map Number(s)	B2
Database(s)/ID No(s).	RCRA NonGen/NLR; NY MANIFEST / EPA ID: NYP004036679
Database Review Summary	Non-generator, historic large quantity generator (LQG), disposed of hazardous waste, no violations or evidence of spills or releases. West Street and Hudson Street was listed on the NY Manifest database in 1999 for the transportation of approximately 10,000 pounds of benzene affected waste (waste code – B007).
REC(s) identified:	Information in the databases does not suggest contamination, and there is limited potential to impact the Site.

Address & Facility Name	West Street Near Reade Street
Radius Map Number(s)	A1
Database(s)/ID No(s).	NY Spills / Spill #: 9900871
Database Review Summary	Spill date 04/23/1999, 20-gallons of gasoline and 2-gallons of motor oil were released due to a vehicle tank rupture. Spill was contained and cleaned up. Closed on 05/05/1999.
REC(s) identified:	Information in the databases does not suggest contamination, and there is limited potential to impact the Site.

Address & Facility Name	Chambers St & River Terrace
Radius Map Number(s)	C3
Database(s)/ID No(s).	NY Spills / Spill #: 9803085
Database Review Summary	Spill date 06/09/1998, unknown hazardous material released into Hudson River. Closed on 06/09/1998.
REC(s) identified:	Information in the databases does not suggest contamination on land, and there is limited potential to impact the Site.

4.1.2 Adjoining Property Environmental Database Record Review

The following adjoining properties[1] were identified in the regulatory agency database report:

- 377 Greenwich Street
- 345 Chambers Street – Stuyvesant High School
- 41 River Terrace – Tribeca Pointe L.L.C.
- 34 River Terrace – Tribeca Park
- 22 River Terrace – REDCAP 1 Inc., Residential Building
- 20 River Terrace

1 Due to the large study area, errant listings not within the corridor were identified as adjoining properties and these were omitted from the below discussion.

- 1 North End Avenue / 300 Vesey Street
- 377 Rector Place – Liberty House Condominium
- 380 Rector Place – Liberty Terrace

Information for adjoining properties included in the regulatory agency database report was reviewed and is summarized in the following tables:

Address & Facility Name	377 Greenwich Street
Radius Map Number(s)	1. G62 2. G63
Distance from Site and Hydraulic Gradient	Adjoining N. Moore Street section to the east Upgradient
Database(s)/ID No(s).	1. NY Spills / Spill #: 0306306 2. NY Brownfields / Site Code: 57850
Database Review Summary	1. A spill was reported on 8/24/2003 when SVOC and mercury were detected during a Phase II investigation at levels exceeding TAGM. The Site was excavated for redevelopment. Notes in this database mention the property owner's filing a Brownfield Cleanup Program (BCP) application for tax purposes, which is discussed below. No further evidence of contamination was identified by the NYSDEC, and the spill was closed on 8/24/2005. 2. Records identified the facility as a vacant lot, and the location of a demolished former two-story parking garage, which was in the process of being redeveloped as a hotel. Low levels of metals contamination were detected at the facility. Test pits conducted in 2004 indicated the presence of two 500-gallon underground storage tanks (USTs). No further information regarding investigations or remediation is included. The NYSDEC determined the facility did not meet the criteria of the BCP.
REC(s) identified:	Information in the databases does not suggest contamination, and there is limited potential to impact the Site.

Address & Facility Name	345 Chambers Street 1. NYC BD of ED – New Stuyvesant High School 2. Stuyvesant High School 3. West Side Highway 4. WTC Debris, Hudson River
Radius Map Number(s)	1. M38 2. M37 3. M42 4. M43
Distance from Site and Hydraulic Gradient	Adjoining North Esplanade section to the south Upgradient
Database(s)/ID No(s).	1. RCRA NonGen/NLR; NY MANIFEST / EPA ID: NYR000086860 2. NY AST / Facility ID: 2-606231 3. NY SPILLS / Spill ID # 9413495 4. NY SPILLS / Spill ID # 0107885

Database Review Summary	1. Historic generator of ignitable and corrosive waste. No evidence of releases, no violations. Air violations reported. 2. Active PBS facility, four 10,000-gallon #2 fuel oil aboveground tanks – on saddles, legs, racks, etc. installed 01/01/1992; one 1,080-gallon diesel fuel aboveground tank – on saddles, legs, racks, etc. installed 01/01/1992; one 275-gallon #2 fuel oil aboveground tank– on saddles, legs, racks, etc. installed 01/01/1992; one 75-gallon diesel fuel aboveground tank – on saddles, legs, racks, etc. installed 01/01/1992. 3. Spill date 01/10/1995, hydraulic oil and unknown petroleum released from broken street sweeper. Spill closed 01/10/1995. 4. Spill date 11/01/2001, caller reported barges containing rubble from the World Trade Center are giving off smoke/dust/fumes. Spill closed 02/13/2003.
REC(s) identified:	Information in the databases does not suggest contamination, and there is limited potential to impact the Site.

Address & Facility Name	41 River Terrace 1. Tribeca Pointe L.L.C. 2. 41 River Terrace
Radius Map Number(s)	1. C5 2. C6
Distance from Site and Hydraulic Gradient	Adjoining Rockefeller Park section to the east Upgradient
Database(s)/ID No(s).	1. NY AST / Facility ID: 2-607114 2. Emergency Response Notification System (ERNS)
Database Review Summary	1. Active PBS facility, installed 08/26/1999, one 7,500-gallon #2 fuel oil aboveground tank – contact with soil (tank bottom rests on the soil, allowing no visual inspection) 2. ERNS database describes a caller reported a vessel was releasing unknown oil into the water on 06/13/2013.
REC(s) identified:	Information in the databases does not suggest contamination, and there is limited potential to impact the Site.

Address & Facility Name	Tribeca Park 34 River Terrace
Radius Map Number(s)	C9
Distance from Site and Hydraulic Gradient	Adjoining Rockefeller Park section to the east Upgradient
Database(s)/ID No(s).	NY AST / Facility ID: 2-605106
Database Review Summary	Active PBS facility, installed 04/01/1998, one 10,000-gallon #6 fuel oil aboveground tank – contact with soil (tank bottom rests on the soil, allowing no visual inspection).
REC(s) identified:	Information in the databases does not suggest contamination, and there is limited potential to impact the Site.

Address & Facility Name	22 River Terrace 1. Residential Building 2. REDCAP 1 Inc
Radius Map	1. L33

Number(s)	2. L34
Distance from Site and Hydraulic Gradient	Adjoining Rockefeller Park section to the east Upgradient
Database(s)/ID No(s).	1. NY Spills / Spill #: 1011227, 0004096 2. EDR Historic Drycleaners
Database Review Summary	1. Spill #1011227: Spill date 02/08/2011, buried fill line ruptured releasing #2 fuel oil. Contaminated soil was removed. Spill closed 05/03/2011. Spill #0004096: Spill date 07/05/2000, small amount of petroleum spilled from a machine. Spill closed 07/12/2005. 2. REDCAP1 is listed in the historic drycleaners database from 2003 through 2007 as "Garment Pressing and Cleaners' Agents."
REC(s) identified:	The facility is at a higher elevation and adjacent to the Site; therefore, its listing as a historical registered dry cleaner with documented use of solvents represents a REC.

Address & Facility Name	20 River Terrace
Radius Map Number(s)	I25
Distance from Site and Hydraulic Gradient	Adjoining Rockefeller Park section to the east Upgradient
Database(s)/ID No(s).	NY Spills: Spill #: 0613746
Database Review Summary	Approximately 7 gallons of sodium hydroxide were spilled on pavement on 03/23/2007. Fire Department contained and cleaned the spill, and the case was closed on 3/30/2007.
REC(s) identified:	Information in the databases does not suggest contamination, and there is limited potential to impact the Site.

Address & Facility Name	1 North End Avenue / 300 Vesey Street 1. One North End Avenue 2. 300 Vesey Street
Radius Map Number(s)	1. K31, K32 2. K46
Distance from Site and Hydraulic Gradient	Adjoining Rockefeller Park section to the east, and Belvedere Plaza and North Cove section to the north Upgradient
Database(s)/ID No(s).	1. NY UST; NY AST / Facility ID: 2-612088 2. NY AST / Facility ID: 2-612582
Database Review Summary	1. 2-612088: Active PBS facility, installed 02/11/1997, two 10,000-gallon USTs and one 400-gallon diesel fuel AST in subterranean vault with access for inspections. 2. 2-612582: Active PBS facility, installed 07/31/2016, one 11,000-gallon diesel fuel aboveground tank – on saddles, legs, racks, etc.
REC(s) identified:	Information in the databases does not suggest contamination, and there is limited potential to impact the Site.

Address & Facility Name	Liberty House Condo 377 Rector Place
Radius Map Number(s)	F10

Distance from Site and Hydraulic Gradient	Adjoining BPC Esplanade Mid-Section to the east Upgradient
Database(s)/ID No(s).	NY UST / Facility ID: 2-340332
Database Review Summary	Active PBS facility with one 10,000-gallon #4 fuel oil UST installed 01/01/1986 and one 10,000-gallon #4 fuel oil UST installed 01/01/1986 temporarily out of service.
REC(s) identified:	Information in the databases does not suggest contamination, and there is limited potential to impact the Site.

Address & Facility Name	380 Rector Place 1. Liberty Terrace 2. Spill Number 0107214 3. Con Edison 4. 380 Rector Street
Radius Map Number(s)	1. F23 2. F20 3. F24 4. F19, F21, F22
Distance from Site and Hydraulic Gradient	Adjoining BPC Esplanade Mid-Section to the east Upgradient
Database(s)/ID No(s).	1. NY AST / Facility ID: 2-345504 2. NY LTANKS / Spill #: 0406614 3. NY SPILLS / Spill #: 0411419 4. ERNS
Database Review Summary	1. Active PBS facility, installed 10/01/1986, one 10,000-gallon #4 fuel oil aboveground tank in subterranean vault with access for inspections. 2. Spill date 09/16/2004, standing oil found on concrete tank room floor due to tank overfill. Closed on 02/04/2005. 3. Spill reported 09/16/2004, oil found in oil tank room. Duplicate spill report. Combined with Spill # 0406614. Closed 01/21/2005. 4. Caller reported responsible party overfilled a storage tank. Reported sheen on water and discoloration on Hudson River that stretches 1 mile.
REC(s) identified:	Information in the databases does not suggest contamination, and there is limited potential to impact the Site.

4.1.3 Surrounding Property Environmental Database Record Review

The following factors were evaluated with respect to the potential for contaminant migration to the Site from surrounding properties to determine whether a summary of the regulatory agency database listing should be included in this report:

- Location of the property compared to the Site vis-à-vis groundwater migration based on the local topography and the assumed groundwater depth and north-northwest shallow groundwater flow direction;

- Location of the property compared to the Site vis-à-vis vapor migration based on readily available information pursuant to the ASTM E 1527-13 standard including soil and geological characteristics; contaminant characteristics; contaminated plume migration data; and significant conduits that might provide preferential pathways for vapor migration such as major utility corridors, sanitary sewers, storm sewers, and significant natural conduits;

- Status of listing (e.g., whether the applicable regulatory authority has issued a No Further Action letter or other similar closure document);
- Type of database and whether the presence of contamination is known; and
- The distance between the listed property and the Site.

Based on this evaluation, the review of additional environmental records has been limited to the properties listed below, since contamination at the other properties identified by the regulatory agency database report is unlikely to migrate to the Site and, therefore, unlikely to impact the environmental integrity of the Site.

Address & Facility Name	Kims Cleaners 370 Greenwich Street
Radius Map Number(s)	Q147
Distance from Site and Hydraulic Gradient	183 feet southeast of N. Moore Street section Upgradient
Database(s)/ID No(s).	EDR Hist Cleaners
Database Review Summary	Facility is identified as “Drycleaning Plants, Except Rugs” from 1993 through 2014.
REC(s) identified:	The nearby upgradient location of a historical dry-cleaning plant represents a REC.

Address & Facility Name	Trio Cleaners 395 Greenwich Street
Radius Map Number(s)	G181
Distance from Site and Hydraulic Gradient	226 feet north-northeast of N. Moore Street section Cross gradient
Database(s)/ID No(s).	EDR Hist Cleaners
Database Review Summary	Facility is identified as “Drycleaning Plants, Except Rugs, NEC” from 2005 through 2014.
REC(s) identified:	The nearby location of a historical dry-cleaning plant represents a REC.

Address & Facility Name	Golden Cleaners 111 Hudson Street
Radius Map Number(s)	Z360
Distance from Site and Hydraulic Gradient	410 feet northeast of N. Moore Street section Upgradient
Database(s)/ID No(s).	EDR Hist Cleaners
Database Review Summary	Facility is identified as “Drycleaning Plants, Except Rugs” from 1993 through 1998 and 2001 2003.

REC(s) identified:	The nearby upgradient location of a historical dry-cleaning plant represents a REC.

Address & Facility Name	124-130 Hudson Street 1. Ericsson Auto Service Center 2. 124 Hudson Street
Radius Map Number(s)	1. Z567 2. Z569
Distance from Site and Hydraulic Gradient	565 feet northeast of N. Moore Street section Upgradient
Database(s)/ID No(s).	1. NY Spills / Spill #: 9902546 2. EDR Hist Auto
Database Review Summary	1. A spill was reported on 6/4/1999 after soil contamination was encountered when removing USTs. 4,600 tons of petroleum contaminated soil was removed. Three wells were installed and VOCs (specifically MTBE) and SVOCs were detected at high concentrations. In 2001 free product was observed, but information provided suggests this was due to illegal dumping. Remediation efforts were implemented through 2006, and an additional investigation confirmed contamination was mostly remediated, and had not migrated off-site. The spill was closed on 07/11/2006. 2. Facility is identified as a gasoline service station in 1975, “truck rental and leasing without drivers” in 1987, “Ericcson Auto Service Center / Outdoor Parking Services” from 1989 through 1993.
REC(s) identified:	Due to the distance from the Site and the remedial status, there is limited potential for impact to the Site.

Address & Facility Name	Independent Plaza Cleaners 34 Harrison Street
Radius Map Number(s)	Q320
Distance from Site and Hydraulic Gradient	365 feet east of West Street section Upgradient
Database(s)/ID No(s).	EDR Hist Cleaners
Database Review Summary	Facility is identified as “Garment Pressing and Cleaners’ Agents” from 1986 through 1994.
REC(s) identified:	The nearby upgradient location of a historical dry-cleaning plant represents a REC.

Address & Facility Name	Greenwich Cleaners 331 Greenwich Street
Radius Map Number(s)	AI528
Distance from Site and Hydraulic Gradient	541 feet east of West Street section Upgradient
Database(s)/ID No(s).	Drycleaners / Facility ID: 2-6205-01198 EDR Hist Cleaners

Database Review Summary	The Drycleaners database identifies the facility from 2000 through 2018 as using the dry-cleaning solvent DF-2000; CAS 64742-48-9, synthetic hydrocarbon, ExxonMobil. The EDR Hist Cleaners database identifies the facility as “Drycleaning Plants, Except Rugs” from 1994 through 2014.
REC(s) identified:	The nearby upgradient location of a historical and recent dry-cleaning plant represents a REC.

Address & Facility Name	325 South End Avenue: 1. Gateway Cleaners 2. Ginos Battery Park Cleaners 3. Gateway/Gino’s Battery Pk Clners
Radius Map Number(s)	1. AH351 2. AH353 3. AH354
Distance from Site and Hydraulic Gradient	402 feet east of BPC Esplanade Mid-Section Upgradient
Database(s)/ID No(s).	1. RCRA Very Small Quantity Generator (VSQG); NY MANIFESTS / EPA ID: NYD981133572 2. Drycleaners / Facility ID: 2-6205-00286 3. EDR Hist Cleaners
Database Review Summary	1. The facility is a VSQG for generating spent halogenated solvents (F002), and was historically a LQG in 1985, a SQG in 1999, and a CESQG in 2006 and 2007. Manifest records were available for the disposal of 80 pounds of F002 and D039 waste. 2. The Drycleaners database identifies the facility from as a drop shop as recently as “May 10, 2011”. 3. The EDR Hist Cleaners database identifies the facility as “Drycleaning Plants, Except Rugs” from 1985 through 1987, and 1989 through 2014.
REC(s) identified:	The nearby upgradient location of a historical dry-cleaning plant represents a REC.

Address & Facility Name	Liberty Cleaners 225 South End Avenue
Radius Map Number(s)	AB329
Distance from Site and Hydraulic Gradient	370 feet east of BPC Esplanade Mid-Section Upgradient
Database(s)/ID No(s).	EDR Hist Cleaners
Database Review Summary	The EDR Hist Cleaners database identified the facility as “Drycleaning Plants, Except Rugs” from 1994 through 2014. This facility was identified during the Site reconnaissance (discussed in Section 6) where information provided by a staff member indicated this facility does not currently dry clean on site.
REC(s) identified:	The nearby upgradient location of a historical dry-cleaning plant represents a REC.

Address & Facility Name	Elite French Cleaners 245 South End Ave
Radius Map Number(s)	AB338
Distance from Site and Hydraulic Gradient	381 feet east of BPC Esplanade Mid-Section Upgradient
Database(s)/ID No(s).	EDR Hist Cleaners
Database Review Summary	The EDR Hist Cleaners database identified the facility as "Drycleaning Plants, Except Rugs" from 1994 through 2014.
REC(s) identified:	The nearby upgradient location of a historical dry-cleaning plant represents a REC.

Address & Facility Name	Fresh Cleaners 300 Rector Place
Radius Map Number(s)	R175
Distance from Site and Hydraulic Gradient	216 feet east of BPC Esplanade Mid-Section Upgradient
Database(s)/ID No(s).	Drycleaners / Facility ID: 2-6205-01752
Database Review Summary	The facility was identified as a drop shop as recently as 3/2/2010.
REC(s) identified:	The facility's identification as a drop shop indicates dry-cleaning activities are not performed at the Site; therefore, there is limited potential for impact to the Site.

Address & Facility Name	Four Seasons Dry Cleaning 21 South End Avenue (Apt 437)
Radius Map Number(s)	N70, N74
Distance from Site and Hydraulic Gradient	171 feet east of BPC Esplanade Mid-Section, 120 feet north of the South Cove Section Upgradient
Database(s)/ID No(s).	EDR Hist Cleaners RCRA-SQG; NY MANIFEST / EPA ID: NYD986986297 Drycleaners / Facility ID: 2-6205-00676
Database Review Summary	The facility was identified as a "Drycleaning Plants, Except Rugs" from 1993 through 2008, and 2012 through 2014. The facility generated hazardous waste including various spent halogenated solvents (F002), and undefined hazardous wastes (D000). The facility was historically a SQG and conditionally exempt small quantity generator (CESQG), and no violations are associated with its SQG status. Manifest records are available for the disposal of 650 pounds of F002 material and tetrachloroethylene (D039). The facility was identified as a dry cleaner from 1999 through 2017 and is referenced as using the dry-cleaning solvent "DF-2000; CAS 64742-48-9, synthetic hydrocarbon, ExxonMobil." This facility was identified during the Site reconnaissance (discussed in Section 6) as having a dry-cleaning plant on the premise.
REC(s) identified:	The nearby upgradient location of a historical and current dry-cleaning plant represents a REC.

Address & Facility Name	2 South End Avenue: 1. South Cove Cleaner 2. South Cove French Cleaners
Radius Map Number(s)	1. N92 2. N90
Distance from Site and Hydraulic Gradient	374 feet east of BPC Esplanade Mid-Section,129 feet northeast of the South Cove Section Upgradient
Database(s)/ID No(s).	1. RCRA-SQG; NY MANIFEST / EPA ID: NY0000881656 Drycleaners / Facility ID: 2-6205-01272 2. EDR Hist Cleaners
Database Review Summary	1. The facility generated hazardous waste including chromium (D007), tetrachloroethylene (D039), and spent cyanide plating from bath solutions from electroplating operations (F007). Records identify the facility as a SQG from 1994 through 2007. The facility has received violations, although specific information is not provided, and has undergone an on-site compliance evaluation inspection. Manifest records are available for the disposal of 260 pounds of F002 and D039 materials. The facility was identified as a dry cleaner from 2000 through 2018, and is referenced as using the dry-cleaning solvent "EcoSolv; CAS 68551-17-7, highly refined hydrocarbon, Chevron Philips." 2. The facility was identified as a "Drycleaning Plants, Except Rugs" from 1996 through 2013. This facility was identified during the Site reconnaissance (discussed in Section 6) as having a dry-cleaning plant on the premise.
REC(s) identified:	The nearby upgradient location of a historical and current dry-cleaning plant represents a REC.

Unless otherwise noted, the information obtained from the files/records review was sufficient to evaluate the existence of RECs, HRECs, CRECs, and/or *de minimis* conditions in connection with the Site.

4.2 Additional Environmental Record Sources

Matrix contacted the USEPA, NYSDEC, NYCDEP, the FDNY, NYCOER and NYSDOH with Freedom of Information Act/Law (FOIA/FOIL) requests regarding environmental files associated with the Site. Copies of FOIL requests and responses and property documentation are provided in **Appendix E** and are summarized below.

- Matrix submitted a FOIL request to NYCDEP, FDNY, and NYSDOH on July 1, 2021. Matrix's requests were acknowledged, but as of the date of this report, responses regarding the availability of files have not been received. Once received, should the FOIL responses change the findings of this report, Matrix will prepare an addendum.
- Matrix submitted a FOIA request to USEPA on July 1, 2021. Matrix's request was acknowledged, but as of the date of this report, a response regarding the availability of files has not been received. Once received, should the FOIL response change the findings of this report, Matrix will prepare an addendum.

- Matrix submitted a FOIL request to NYCOER on July 1, 2021. OER responded on July 9, 2021, stating that after a diligent search no records were found pertaining to the information request and closed the FOIL request.
- Matrix submitted a FOIL request to the NYSDEC on July 1, 2021. NYSDEC responded on July 7, 2021, stating that after a diligent search no records were found pertaining to the information request and closed the FOIL request.

In addition, Matrix performed a search of the NYCDEP Searchable Property Environmental E-Database (SPEED) on July 1, 2021, and a search of the USEPA Envirofacts My Property Database on July 16, 2021. The review of SPEED identified an additional ten active and one closed PBS facilities located within or adjoining the Site Corridor. Based on the information available and the lack of evidence of a spill history, these listings are not considered RECs.

- Facility 2-603491 was identified as “WESTSIDE HIGHWAY (RTE 9A)”, located on the “West of Southbound lanes of 9A, between N. Moore & Hurbert streets,” is associated with four 550-gallon USTs that were closed/removed prior to May 21, 2003.
- Facility 2-609057 was identified as “CITIGROUP”, located at 388 Greenwich Street, is associated with two active petroleum storage tanks: one 1,000-gallon and one 250-gallon ASTs.
- Facility 2-273074 was identified as “CITIGROUP GLOBAL MARKETS INC”, located at 390 Greenwich Street, is associated with four active 20,000-gallon subterranean ASTs.
- Facility 2-342149 was identified as “BOROUGH OF MANHATTAN COMMUNITY COLLEG”, located at 199 Chambers Street, is associated with three active petroleum storage tanks: one 5,000-gallon, one 50-gallon, and one 330-gallon ASTs.
- Facility 2-612526 was identified as “IP MORTGAGE BORROWER LLC”, located at 310 Greenwich Street, is associated with one active 40,000-gallon semi-underground UST.
- Facility 2-607112 was identified as “RIVER AND WARREN CONDOMINIUM”, located at 212 Warren Street, is associated with one active 8,000-gallon AST.
- Facility 2-607905 was identified as “FOUR WORLD FINANCIAL CENTER”, located at 250 Vesey Street, is associated with five active petroleum storage tanks: one 14,834-gallon, one 4,000-gallon, two 10,500-gallon, and two 275-gallon ASTs.
- Facility 2-601825 was identified as “WFC TOWER D COMPANY”, located at 250 Vesey Street, is associated with two active petroleum storage tanks: one 4,000-gallon and one 275-gallon ASTs.
- Facility 2-297828 was identified as “AMERICAN EXPRESS TOWER C”, located at 200 Vesey Street, is associated with four active and two closed/removed petroleum storage tanks. Active:

two 1,500-gallon and two 5,000-gallon ASTs. Closed/removed: two 275-gallon ASTs.

- Facility 2-607454 was identified as "2 WORLD FINANCIAL CENTER – SOUTH TOWER", located at 225 Liberty Street, is associated with five active petroleum storage tanks: one 4,000-gallon, two 7,500-gallon and two 275-gallon ASTs.
- Facility 2-373079 was identified as "1 RECTOR PARK CONDOMINIUM", located at 333 Rector Place, is associated with one active 20,000-gallon subterranean AST.

A copy of the SPEED search results and PBS Facility information provided in **Appendix E.**

The review of USEPA's Envirofacts database identified an additional three facilities with past hazardous waste generator designations within the Site or located within adjoining properties on the RCRAINFO database: Rite-Aid #10534, located at 225 Liberty Street, was identified as a CESQG and a hazardous waste biennial reporter; BMCC – Borough of Manhattan Community College, located at 188 Chambers Street, and NYC – Dept of Education PS840M, located at 344 Greenwich Street, were identified as a SQGs.

The review of Envirofacts identified the following four facilities with air emissions/pollutants registries within the targeted area or located within adjoining properties on the ICIS-AIR/ FACILITY INFORMATION SYSTEM (NY)/AIR FACILITY SYSTEM/ EMISSION INVENTORY SYSTEM databases: Independence Plaza North, located at 310 Greenwich Street; Regatta located at 21 South End Avenue; Rockrose Construction Corp., located at 333 Rector Place; and Citigroup Global Markets Inc, located at 388/390 Greenwich Street.

A copy of the USEPA Envirofacts Search Results is provided in **Appendix E.**

4.3 Historical Use of Site, Adjoining, and Surrounding Properties

Past uses and conditions of the Site Corridor and adjoining and surrounding properties identified during the historical information review described herein, are summarized below:

4.3.1 Sanborn Maps

A search was completed through EDR for historical Sanborn Fire Insurance (Sanborn) maps for the Site. Fire insurance maps were initially produced by private companies for the insurance industry to provide information on fire risks to buildings and other structures. Fire insurance maps serve as an historical resource for evaluating the potential for Site contamination based on history of past use. As a result of the search, Sanborn maps for the years 1894, 1905, 1913, 1919, 1922, 1923, 1928, 1950, 1968, 1976,

1977, 1978, 1979, 1980, 1981, 1983, 1985, 1987, 1988, 1990, 1991, 1992, 1993, 1994, 1995, 1996, 2001, 2002, 2003, 2004, and 2005 were available for the Site and surrounding area. A copy of the Sanborn Map Report is included in **Appendix D**.

On-Site

As early as 1894, the Hudson River and numerous piers were located within the North Esplanade section and all of the West Alignment. The West Street section was occupied by West Street, which runs north to south, and the N. Moore Street section was occupied by North Moore Street, which runs east to west. By 1950, an elevated ramp and highway was noted on the West Street section. The Site Corridor is relatively unchanged through at least 1978. By 1981, the northern half of the BPC Esplanade Mid-Section and the southern 2/3 of the Belvedere Plaza and North Cove section, both previously occupied by the Hudson River and various piers, have been filled in and are developed with the Battery Park City Esplanade and Esplanade Park, a building labelled as part of the Gateway Plaza development intersects with the northern portion of the BPC Esplanade Mid-Section, and the overall area is labeled as Battery Park City. By 1985, the remainder of the Belvedere Plaza and North Cove section and southern portion of the Rockefeller Park section were largely filled in and developed with the BPC Esplanade and park space. By 1987, Gateway Plaza appears to have expanded an additional building within the footprint of the BPC Esplanade Mid-Section, which appears to be residential use. By 1988, the entire BPC Esplanade Mid-Section of the West Alignment was filled and occupied by the continuation of the BPC Esplanade. By 1992, the entire South Cove, Rockefeller Park, and North Esplanade sections were filled in, River Terrace had been constructed within most of the Rockefeller Park section, Stuyvesant High School was constructed adjoining the North Esplanade section, and the elevated ramp on West Street was no longer depicted. The remainder of the Site remains consistent through 2005.

Adjoining Properties

As early as 1894, small structures and some multiple-story buildings appearing mostly residential were depicted adjoining the N. Moore Street and West Street sections of the North Alignment, while the remainder of the North and West Alignments were adjoined by numerous piers and the Hudson River. By 1923, multi-lot buildings including those for commercial use had been constructed adjoining the West Street and N. Moore Street sections of the North Alignment.

The 1950 Sanborn map depicts several additional buildings were developed adjoining the N. Moore Street and West Street sections of the North Alignment to the north, most of which were designated as commercial use including: a warehouse, upholsterer, and an auto repair facility with a gasoline tank at

211 West Street, and a garage with two 550-gallon gasoline tanks at 68 North Moore Street. The 1968 Sanborn map depicts properties adjoining the N. Moore Street section as vacant. By 1977 several blocks adjoining the N. Moore Street and West Street sections appeared vacant, including the previously noted auto repair facility at 211 West Street, and the large apartment complex Independence Plaza was constructed adjoining the N. Moore Street section to the south.

By 1981, BMCC was depicted adjoining the N. Moore Street section to the south and the West Street section to the east, and the adjoining northern half of the BPC Esplanade Mid-Section and area adjoining the Belvedere Plaza and North Cove sections to the east appeared to have been filled in with several commercial and residential properties developed at this location. Development in this area included the large residential development Gateway Plaza, and an underground pumping station adjoining the intersection of the BPC Esplanade Mid-Section with the Belvedere Plaza and North Cove section to the southeast. By 1985, the areas adjoining the Belvedere Plaza and North Cove and the southern portion of the Rockefeller Park sections were filled, several commercial properties were constructed adjoining the Belvedere Plaza and North Cove section, and a park adjoined the southern portion of the Rockefeller Park section. By 1988, areas adjoining the remainder of the BPC Esplanade Mid-Section were filled in and several residential apartment complexes were constructed in this area. By 1990, the garage with gasoline tanks previously noted at 68 North Moore Street were no longer depicted. Areas adjoining the South Cove section and the remainder of the Rockefeller Park section, and a network of roads were adjoining these sections by 1992.

By 2001, the Museum of Jewish Heritage was constructed adjoining the southern extent of the South Cove section to the south. Development of buildings, parks, and roads continued through the 1990s up to 2002. No other significant changes are apparent through 2005.

Surrounding Properties

The properties surrounding the Site in 1894 were developed with many roads and commercial, industrial, and residential properties. The surrounding area appears to be dense, urban development. In 1919, several warehouses were noted in the area north of the N. Moore Street section. In 1923 the surrounding area remained densely developed with increased commercial and industrial properties including: a printer, ice plant, paper warehouse, street cleaning headquarters, and drugstore. In 1923, a large building located at 56-62 North Moore Street, approximately 240 feet east of N. Moore Street section, was identified as having a garage with four gasoline underground tanks with a total capacity of 1,080-gallons.

By 1950 the surrounding area continued to develop with new commercial businesses, multi-story and multi-lot buildings, the development of the Brooklyn-Battery Tunnel to the southeast, and various changes in the industrial and light industrial facilities. A filling station was depicted at 166 West Street, approximately 1,000 feet east of the Rockefeller Park section of the West Alignment, with four gasoline tanks. By 1968 the United Mineral Chemical Corp was constructed at 125-133 Hudson Street, approximately 400 feet northeast of the N. Moore Street section, and the entrance to the Holland Tunnel was depicted approximately 600 feet northeast of the N. Moore Street section.

Development of the surrounding area continued through 1977 with the addition of new commercial businesses, additional large buildings including the World Trade Center, and changes in industrial facilities. An auto repair garage was noted at 162 West Street. By 1981 the filling station and repair garage were replaced by parking. Development continued throughout the 1970s and 1980s with various changing businesses, including the addition of Battery Park City and large office buildings east of West Street in lower Manhattan.

Development continued through 2005, including changing commercial businesses, and the demolition and construction of new buildings. As of the 2005 Sanborn map, the area formerly occupied by the World Trade Center is depicted as mainly vacant, with only a subway line and the WTC Path Station noted.

The review of the historical Sanborn maps identified the following REC:

- Fill material from an unknown source placed throughout the entire West Alignment and North Esplanade section as early as 1981 and ending by 1992.

4.3.2 Aerial Photographs

A search was completed through EDR for historical aerial photographs for the Site. Aerial photographs were reviewed for the years 1924, 1940, 1943, 1954, 1961, 1966, 1971, 1974, 1981, 1985, 1994, 1997, 2006, 2010, 2013, and 2017. Each aerial photograph is scaled at 1” = 875’. These photographs were used to determine prior land usage and major improvements to the Site and surrounding area. A copy of the Aerial Photograph Report is included in **Appendix C**.

<u>On-Site</u>

From 1924 through 1966, the entire West Alignment and North Esplanade section of the North Alignment were located within the Hudson River with multiple piers constructed through it, and the West Street and N. Moore Street sections of the North Alignment were located on public roads. By 1940, the West Street

section of the North Alignment appeared to have been developed into a major roadway. The alignment remains relatively unchanged until 1971, when the BPC Esplanade Mid-Section of the West Alignment was filled in as the coastline was extended to the west and appeared to be used for staging debris, vehicles, and containers. In the 1974 aerial photograph, the South Cove section of the West Alignment was filled in as the coastline was extended towards the southwest and appeared as vacant land. The 1981 aerial photo depicts the Belvedere Plaza and North Cove, Rockefeller Park, and North Esplanade sections of the Alignments were filled in as the coastline was extended to the west, and these areas appeared to be vacant land. By 1985, the southern half of the Rockefeller Park section, the Belvedere Plaza & North Cove section, and the BPC Esplanade Mid-Section appear to be used for storing shipping containers. By 1994, a roadway was developed within the Rockefeller Park section, and parts of the North Cove marina and BPC Esplanade appear to have been developed. The 1997 aerial photograph shows more clearly that West Street has been developed into a major roadway, and the North Esplanade and all sections of the West Alignment are paved areas consistent with their current configuration. No further significant changes are apparent through the 2017 aerial photograph.

Adjoining Properties

In 1924 properties adjoining the West Alignment and North Esplanade included piers and the Hudson River, and the N. Moore Street and West Street sections were adjoined by several buildings and roads. By 1940, the northern portion of West Street was further developed into a major roadway that appeared partially elevated, and by 1954 the length of West Street visible in the aerial photograph was developed into a major roadway. By 1971, the area adjoining the BPC Esplanade Mid-Section was filled in with materials of an unknown source and appeared to be used as a staging area for debris, vehicles, and containers. Most buildings adjoining the N. Moore Street and West Street sections had been demolished, and most of these lots remained vacant. By 1974, the area adjoining the South Cove section to the east and west were filled in and appeared vacant; the area adjoining the BPC Esplanade Mid-Section to the west appeared to be in the process of land-filling; piers adjoining the Rockefeller Park section to the east were in the process of being removed; and large towers were constructed adjoining the N. Moore Street section to the north and south. The areas adjoining the entire West Alignment to the east and west and adjoining the North Esplanade section to the north and south, were filled in by 1981. By this time, some buildings had been constructed adjoining the BPC Esplanade Mid-Section to the east, a few buildings had been constructed adjoining the West Street section to the east, and several large buildings were constructed adjoining the N. Moore Street section to the north and south. Development of several buildings continued through 1994 along the entire North and West Alignments, except for the northern half of the Rockefeller Park section. Notable development by 1994 included the World Financial Center

adjoining the Belvedere Plaza and North Cove section to the east, and the North Cove marina to the west. At this time, the Rockefeller Park section was adjoined by three vacant lots to the east, and Rockefeller Park had been developed to the west. The remaining vacant lots adjoining the Rockefeller Park section to the east were developed with large buildings by 2006. No further significant changes are apparent through the 2017 aerial photograph.

Surrounding Properties

As of 1924, properties surrounding the entire West Alignment and North Esplanade section include the Hudson River to the west, West Street followed by urban development to the east, and piers to the north and south. The West Street section was surrounded by the continuation of West Street to the north and south, piers to the west, and urban development to the east. The N. Moore Street section was surrounded by urban development to the north, south, and east and West Street followed by piers to the west. The entrance ramp of the Brooklyn-Battery Tunnel (Hugh L. Carey Tunnel) was visible southwest of the Site by 1954. By 1971, several blocks east of the West Alignment and north and south of the N. Moore Street section had buildings demolished and appeared vacant, and the World Trade Center's North and South Towers were being constructed east of the West Alignment. Construction of the Twin Towers appeared complete by 1974, and several of the vacant lots east of the Alignment appeared to be used as parking lots. Several large buildings were developed east of the West Alignment and north and south of N. Moore Street throughout the 1980s. Additional development of Battery Park City is visible in the 1994 aerial photograph, including buildings and parks along the entire West Alignment. By 2006, the World Trade Center was destroyed, and more development of large buildings and park spaces had occurred on the properties surrounding the Rockefeller Park and North Esplanade sections. No further significant changes are apparent through the 2017 aerial photograph.

The review of the historical aerial photographs identified the following REC:

- Fill material from an unknown source placed throughout the entire West Alignment and North Esplanade section as early as 1971 and ending by 1981.

4.3.3 Historical Topographic Maps

An inquiry was made with EDR to obtain historical USGS topographic maps for the Site. Historical topographic maps were reviewed for the following quadrant(s) and years: Staten Island (62500) 1891, 1898, 1900, and 1925; Brooklyn (62500) 1898 and 1900; Passaic (125000) 1905; Brooklyn (24000) 1947, 1955, 1956, 1967, 1979, 1981, 2013, and 2014; and Jersey City (24000) 1947, 1955, 1956, 1967, 1979, 1981, 2013, and 2014. Copies of the historical topographic maps can be found in **Appendix D**.

On-Site

From 1891 through the 1967 topographic maps, the West Alignment and the western half of the North Esplanade section consisted mainly of the Hudson River and piers, and the western half of the Northern Esplanade and the remainder of the North Alignment consisted of roadways. The 1955 topographic map depicts N. Moore Street section to be located in an urban area, and the West Street section to be a major roadway. In the 1979 topographic map, it is evident that landfilling had occurred throughout the West Alignment, and two small buildings were developed within the footprint of BPC Esplanade Mid-Section. No other significant changes are apparent through the 2013/2014 maps.

Adjoining Properties

From 1891 through the 1967 topographic maps, the adjoining properties included piers north, south, and east of the entire West Alignment, north and south of the North Esplanade section, and west of the West Street section; the Hudson River to the west of the West Alignment, North Esplanade section, and West Street section; and city blocks east of the West Street section and north, south, and east of the N. Moore Street section. Railroad tracks were also present adjoining the N. Moore Street section to the east from 1891 through 1925. The 1947 map includes more details indicating the presence of ferry terminals adjoining the Rockefeller Park, Belvedere Plaza and North Cove, and BPC Esplanade Mid-Section to the east, and railway tunnels extending below North Cove and BPC Esplanade Mid-Section. The 1955 topographic map indicates the remainder of West Street is a main road, and West Street and N. Moore Street are adjoined by urban development to the north, east, and south. In the 1979 topographic map, it is evident that a majority of the of the properties adjoining the West Alignment on all sides, and adjoining the North Esplanade to the south had been filled in. The 2013 topographic map depicts additional roads had been developed adjoining the West Alignment to the east.

Surrounding Properties

The surrounding area of the Site is developed with an urban network of roads and city blocks as early as 1891. Additional details are included in the 1947 topographic map, including the development of the entrance/exit ramp to the Brooklyn-Battery tunnel southwest of the Site. The 1955 topographic map depicts areas east of the alignment as urban development, and two cemeteries were depicted approximately ¼-mile east of the Belvedere Plaza North Cove section and BPC Esplanade Mid-Section. The 2013 topographic map no longer indicates urban area, and the cemeteries are no longer depicted.

The review of the historical topographic maps identified the following REC:

- Fill material from an unknown source placed throughout the entire West Alignment and North Esplanade section between 1967 and 1979.

4.3.4 ACRIS

Matrix performed a search of the New York City Department of Finance Automated City Register Information System (ACRIS) on June 30, 2021.

The results of the ACRIS search did not identify any uses that represent RECs to the Site. A copy of the ACRIS search results is included in **Appendix E.**

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

Site reconnaissance performed by:	S. Rosenberg, P. Yum, M. Horowitz.
Methodology:	Walkthrough Site reconnaissance (a photograph log is included as **Appendix F**)
Reconnaissance date:	July 7, 2021
Site representative name:	None
Site representative title:	N/A
Site representative company:	N/A
Limiting condition(s):	None.

5.2 Site Observations

Both the North and West alignments traverse walkways, roads, and bike paths all made up of impervious surfaces including concrete, asphalt, and pavers, as well as pervious landscaped areas. Utilities observed within the North Alignment include storm drains, water mains, gas mains, and buried electrical lines and fiber optic cables. Fenced-off construction areas were observed on the sidewalk along the West Street section, which included refuse and construction-related debris; however, visual observations did not indicate evidence of spills or signs of contamination within this area.

Unless otherwise noted, the items listed in the table below appeared in good condition with no visual evidence of staining, deterioration, or a discharge of hazardous materials and/or petroleum products; and there are no records of a release in these areas. Items where further description is warranted are discussed in the section(s) following the table.

Item	Identified (Y/N/P*)	Currently Present	Historically Present	Description
Hazardous material storage or handling areas	**N**			
Aboveground storage tanks (ASTs) and associated piping	**N**			
Underground storage tanks (USTs) and associated piping	**N**			
Drums & containers (≥5 gallons)	**N**			
Odors	**N**			

Item	Identified (Y/N/P*)	Currently Present	Historically Present	Description
Pools of liquid, including surface water bodies and sumps (handling hazardous substances or substances likely to be hazardous only)	**N**			
Polychlorinated Biphenyls (PCBs) / Transformers	**N**			
Stains or corrosion	**N**			
Drains & sumps	**Y**			(See Section 5.2.1)
Pits, ponds & lagoons	**N**			
Stressed vegetation	**N**			
Solid waste, historic fill, or any other fill material	**N**			
Wastewater (including storm water or any discharge into a drain, ditch, underground injection system, or stream on or adjacent to the Site)	**N**			
Wells (including dry wells, irrigation wells, injection wells, abandoned wells, or other wells)	**N**			
Septic systems or cesspools	**N**			

*Y = Yes
N = No
P = Potential (i.e., confirmed presence or absence unable to be determined during the assessment)

5.2.1 Drains & Sumps

Several storm drains were observed throughout the Site Corridor in the right-of-way. Some storm drain grates had embossed text stating stormwater discharged to the nearest surface water bodies, and several drainage outfalls were visible from the waterfront below the esplanade. The discharge points of all storm drains could not be confirmed.

5.3 Adjoining and Surrounding Properties Reconnaissance

5.3.1 Adjoining Properties

During the Site reconnaissance, Matrix viewed the adjoining properties from the Site and publicly accessible areas (e.g., public roadways, etc.).

Direction from Site	Current Land Use Description
North	<u>North Alignment</u> N Moore Street: Multi-story commercial buildings (388 Greenwich Street, 230 West Street) West Street: Continuation of West Street and the Hudson River Greenway. North Esplanade: Hudson River <u>West Alignment</u> Rockefeller Park: Rockefeller Park Belvedere Plaza & North Cove: Multi-story commercial buildings (300 & 250 Vesey Street), North Cove Yacht Harbor BPC Esplanade Mid-Section: North Cove Yacht Harbor South Cove: Multi-story mixed residential/commercial buildings with dry-cleaning on premises (21 South End Avenue, 88 Battery Place)
East	<u>North Alignment</u> N Moore Street: Multi-story commercial building (71 N. Moore Street) West Street: BMCC (199 Chambers Street) North Esplanade: Hudson River Greenway, multi-story residential/first floor commercial (41 River Terrace) <u>West Alignment</u> Rockefeller Park: Several multi-story buildings including residential, commercial, and mixed residential/commercial (400 Chambers Street, 212 Warren Street, 300 Vesey Street), some with sub-grade garages (10 & 20 River Terrace), Teardrop Park, and the Irish Hunger Memorial Belvedere Plaza & North Cove: Multi-story commercial building (230 Vesey Street), Pumphouse Park, Kowsky Plaza BPC Esplanade Mid-Section: Several multi-story buildings including residential, and mixed residential/commercial (395, 375, & 365 South End Avenue, 350 Albany Street, 377 & 380 Rector Place) including one with dry-cleaning on premise (21 South End Avenue) South Cove: Multi-story residential buildings with sub-grade garages (70 & 50 Battery Place)
South	<u>North Alignment</u> N Moore Street: Multi-story residential buildings (100 N Moore Street), with subgrade parking (80 N Moore Street) West Street: Continuation of West Street North Esplanade: High School (345 Chambers Street) and a multi-story residential building with a commercial first floor (41 River Terrace). A hazardous storage placard was observed on the east side of the High School building; however, chemicals and/or petroleum storage were not visible from the exterior of the building. No spills or evidence of contamination were observed. <u>West Alignment</u> Rockefeller Park: Belvedere Plaza Belvedere Plaza & North Cove: North Cove Yacht Harbor, Kowsky Plaza, Esplanade Plaza BPC Esplanade Mid-Section: South Cove South Cove: South Cove, Museum of Jewish Heritage (36 Battery Place)

Direction from Site	Current Land Use Description
West	North Alignment N Moore Street: West Street West Street: Hudson River Park and Pier 25 North Esplanade: Rockefeller Park West Alignment Rockefeller Park: Rockefeller Park, Hudson River, and Ferry Terminal Belvedere Plaza & North Cove: Hudson River and North Cove Yacht Harbor BPC Esplanade Mid-Section: Hudson River South Cove: Hudson River and two barges supporting apparent construction

5.3.2 Surrounding Properties

Surrounding properties generally include mixed commercial/residential properties interspersed with public parks and schools to the north, east, and south. The Hudson River is located to the west.

6.0 FINDINGS, OPINIONS, AND CONCLUSIONS

6.1 Findings and Opinions

Potential findings can include known or suspect RECs, historical RECs (HRECs), controlled RECs (CRECs) and *de minimis* conditions, pursuant to the ASTM E1527-13 Phase I Standard (see Section 1.1 above). Unless otherwise noted, the information obtained during the files/records review of this Corridor ESA was sufficient to evaluate the existence of RECs, HRECs, CRECs, and *de minimis* conditions. The locations of identified RECs are provided in **Figure 3**.

The EP who prepared this Corridor ESA report was Stephanie Rosenberg, Matrix Associate Project Manager, see **Appendices H** and **I**.

Deviations from the ASTM E1527-13 Phase I Standard are described in Sections 1.3, 5.1, and 7.4 of this report, as applicable.

6.1.1 RECs

REC No. 1: Historic Fill (site wide)

According to the aerial photographs, topographic maps and Sanborn maps provided by EDR, it is apparent that the entire West Alignment has been filled in between the years 1967 and 1992, as the area was reclaimed coastline, expanded into the Hudson River. Further, the North Alignment was likely also filled at some point in its development, as coastal and low-lying areas of the city were most often filled or graded. Historic fill in New York City typically is characterized by contaminated soil and groundwater including heavy metals, semi-volatile organic compounds (SVOCs), pesticides, and polychlorinated biphenyls (PCBs). The potential exists for contamination to be present on-Site.

REC No. 2: Current and Historic Dry-Cleaning Facilities

2A: Current Dry-Cleaning Facilities

- Liberty Cleaners – 225 South End Avenue
- Four Seasons Dry Cleaning – 21 South End Avenue
- South Cove Cleaner – 2 South End Avenue

2B: Former Dry-Cleaning Facilities

- REDCAP 1 Inc – 22 River Terrace
- Kim Cleaners – 370 Greenwich Street
- Trio Cleaners – 395 Greenwich Street

- Golden Cleaners – 111 Hudson Street
- Independent Plaza Cleaners – 34 Harrison Street
- Greenwich Cleaners – 331 Greenwich Street
- Gateway Cleaners/Ginos Battery Park Cleaners – 325 South End Avenue
- Elite French Cleaners – 245 South End Avenue
- Fresh Cleaners – 300 Rector Place

According to the radius report provided by EDR, several historical and current dry-cleaning facilities were identified either on-Site, adjacent to the Site, or in close proximity and upgradient of the Site. Historical and current dry-cleaning facilities may have released solvents used in the drycleaning process into the soil and groundwater. The potential exists for the contamination to be present on-Site due to historical on-Site dry-cleaning facilities as well as migration onto the Site from adjacent and nearby facilities.

Opinion Regarding Additional Investigation

Further investigation is warranted to determine whether elevated concentrations of hazardous materials are present in this area. Matrix will prepare an ESI workplan to investigate the RECs identified in this report.

6.1.2 CRECs

No known or suspected CRECs in connection with the Site were identified during this Corridor ESA.

6.1.3 HRECs

No known or suspected HRECs in connection with the Site were identified during this Corridor ESA.

6.1.4 *De Minimis* Conditions

No known or suspected *de minimis conditions* in connection with the Site were identified during this Corridor ESA.

6.1.5 Other Findings

In Matrix's opinion, and as requested by Client, while not strictly a REC, HREC, CREC, or *de minimis* condition, other noteworthy issues identified during this Corridor ESA that warrant further discussion based on Matrix's authorized scope of work include the following:

Historical Auto Repair Garages:

- *Auto Repair Garage at 211 West Street:* Observed on the 1950 Sanborn map adjoining the West Street section with a potential gasoline storage tank. The garage was demolished and replaced with the Borough of Manhattan Community College (BMC) campus by 1981. No spills or violations are associated with this facility.
- *Garage with PBS Tanks at 68 North Moore Street:* Observed on the 1950 through 1988 Sanborn maps adjoining the N. Moore Street section. The garage was demolished and a vacant lot through the 1990s, a parking lot through 2004, and was replaced by apartment buildings by 2005. No spills or violations are associated with this facility.
- *Garage with PBS tanks 56-62 North Moore Street:* Observed on the 1950 through 2005 Sanborn maps 240 feet east of the N. Moore Street section. No spills or violations are associated with this facility.

6.2 Data Gaps

Pursuant to the ASTM E1527-13 Phase I Standard, a data gap is defined as *a lack of or inability to obtain information required by [the ASTM E1527-13 Phase I Standard] despite good faith efforts by the environmental professional to gather such information*. Pursuant to the ASTM E1527-13 Phase I Standard, *the report shall identify and comment on significant data gaps that affect the ability of the EP to identify RECs and identify the sources of information that were consulted to address the data gaps. A data gap is only significant if other information and/or professional experience raises reasonable concerns involving the data gap*. The term "significant data gap" does not necessarily imply that the relative liability or potential financial risk of the concern is significant.

Matrix has made an appropriate inquiry into the commonly known and reasonably ascertainable resources concerning the historical ownership and use of properties along the Site Corridor back to the first development per 40 CFR Part 312.24 (*Reviews of Historical Sources of Information*). Data gaps identified during this assessment include the following:

1. *As of the time of this report, responses to FOIL/FOIA requests have not yet been received from NYCDEP, FDNY, or NYSDOH.*

Based on the fact that the majority of the Site is located within public rights-of-way, it is not expected that significant records will be returned, and Data Gap No. 1 is not considered *significant*.

6.3 Conclusions

Matrix has performed this Corridor ESA in general conformance with the scope and limitations of ASTM Practice E1527 of the alignment corridor located along the BPC waterfront, north along Hudson River Park and West Street, and east across North Moore Street. Exceptions to, or deletions from, this practice are described in Sections 1.3, 5.1 and 7.4 of this report, as applicable. This assessment has revealed evidence of following RECs that warrant further investigation in connection with the Site:

- REC No. 1: Historic Fill
- REC No. 2: Current and Historical Drycleaning Facilities

6.4 Limiting Conditions

6.4.1 Accuracy and Completeness

The ASTM E1527-13 Phase I Standard recognizes inherent limitations for Phase I ESAs that apply to this report, including:

- **Uncertainty Not Eliminated** – No Phase I ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Data gaps identified during this Corridor ESA are listed in Section 7.2.

- **Not Exhaustive** – A Phase I ESA is not an exhaustive investigation.

- **Past Uses of the Property** – A review of standard historical sources at intervals less than five years is not required.

The Client is advised that the Corridor ESA conducted at the Site is a limited inquiry into a property's environmental status, cannot wholly eliminate uncertainty, and is not an exhaustive assessment to discover every potential source of environmental liability at the Site. Therefore, notwithstanding the conclusions included in this report, Matrix does not make a statement of warranty or guarantee, express or implied, for any specific use that i) the Site is free of RECs or environmental impairment other than those included in Section 7 of this report; ii) the Site is "clean"; or that iii) impairments, if any, are limited to those that were discovered while Matrix was performing the Corridor ESA. This limiting statement is not meant to compromise the findings of this report; rather, it is meant as a statement of limitations within the ASTM E1527-13 Phase I Standard and intended scope of this assessment. Specific limiting conditions identified during the Site reconnaissance are described in Section 5.1. Subsurface conditions may differ from the

conditions implied by surface observations and can be evaluated more thoroughly via intrusive techniques that are beyond the scope of a Phase I ESA. Additional information may be necessary prior to the commencement of demolition, renovation, or other construction activities at the Site.

This report presents Matrix's Site reconnaissance observations, findings, and conclusions as they existed at the time of the Site reconnaissance. Matrix makes no representation or warranty that the past or current operations at the Site are, or have been, in compliance with all applicable federal, state, and local laws, regulations and codes. Matrix makes no guarantees as to the accuracy or completeness of information obtained from others during the course of this Corridor ESA report. It is possible that information exists beyond the scope of this assessment, or that information was not provided to Matrix. Additional information subsequently provided, discovered, or produced may alter findings or conclusions made in this Corridor ESA report; Matrix is under no obligation to update this report to reflect such subsequent information. The findings presented in this report are based upon reasonably ascertainable information and observed Site conditions at the time of the assessment.

This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not assessed. Regardless of the findings stated in this report, Matrix is not responsible for consequences or conditions arising from facts that were not fully disclosed to Matrix during the assessment.

An independent data research company provided the government agency database referenced in this report. Information regarding surrounding area properties was requested for approximate minimum search distances and was assumed to be correct and complete unless obviously contradicted by Matrix's observations or other credible referenced sources reviewed during the assessment.

Matrix is not a professional title insurance firm and makes no guarantee, explicit or implied, that any land title records acquired or reviewed represent a comprehensive definition of property ownership. The Site comprises the area described by the Client as defined and outlined in the authorized proposal.

6.4.2 Warranties and Representations

This report does not warrant against: (1) operations or conditions which were not evident from visual observations or historical information provided; (2) conditions which could only be determined by physical sampling or other intrusive investigation techniques, if no such activities were conducted during this assessment; (3) locations other than the client-provided addresses and/or legal parcel description; or (4)

information regarding off-site location(s) (with possible impact to the Site) not published in publicly available records unless indicated in this report.

6.4.3 Continued Validity/User Reliance

This report is presumed to be valid, in accordance with, and subject to, the limitations specified in the ASTM E1527-13 Phase I Standard, for a period of 180 days from completion of the earliest of the following five items, or until the Client obtains specific information that may materially alter a finding, opinion, or conclusion in this report, or until the Client is notified by Matrix that it has obtained specific information that may materially alter a finding, opinion, or conclusion in this report:

(i) interviews with owners, operators, and occupants;
(ii) searches for recorded environmental cleanup liens;
(iii) searches of federal, tribal, state, and local government records;
(iv) visual inspections of the property and of adjoining properties; and
(v) the declaration by the environmental professional responsible for the assessment or update.

Additionally, pursuant to the ASTM E1527-13 Phase I Standard, this report is presumed valid if completed less than 180 days prior to the date of acquisition of the property or (for transactions not involving an acquisition) the date of the intended transaction.

6.4.4 Significant Assumptions

During this Corridor ESA, Matrix relied on database information; interviews with Site representatives, regulatory officials, and other individuals having knowledge of Site operations; and information provided by the User(s) as requested in our authorized Scope of Work. Matrix has assumed that the information provided is true and accurate. Reliance on electronic database search reports is subject to the limitations set forth in those reports. Matrix did not independently verify the information provided; Matrix found no reason to question the validity of the information received unless explicitly noted elsewhere in this report. If other information is discovered and/or if previous reports exist that were not provided to Matrix, our conclusions may not be valid.

7.0 ADDITIONAL SERVICES

No additional services were performed during this Corridor ESA.

The EDR FieldCheck®System enables EDR's customers to make certain online modifications to the maps and text contained in EDR Radius Map Reports. As a result, the maps and text contained in this Report may have been so modified. EDR has not taken any action to verify any such modifications, and this report and the findings set forth herein must be read in light of this fact. The EDR FieldCheck System accesses user-modified records from previously submitted reports. Any user-modified record from a previous report that is plotted outside the search radius of this report may not be included in this report.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

A search of the environmental records was conducted by Environmental Data Resources, Inc. (EDR). MATRIX NEW WORLD ENG.,INC. used the EDR FieldCheck System to review and/or revise the results of this search, based on independent data verification by MATRIX NEW WORLD ENG.,INC.. The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

An online review and analysis by MATRIX NEW WORLD ENG.,INC. of the NPL list,
as provided by EDR, has revealed that there is 1 NPL site
within approximately 0.125 miles of the target property.

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

An online review and analysis by MATRIX NEW WORLD ENG.,INC. of the SEMS list,
as provided by EDR, has revealed that there is 1 SEMS site
within approximately 0.125 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

An online review and analysis by MATRIX NEW WORLD ENG.,INC. of the RCRA-LQG list, as provided by EDR, has revealed that there are 17 RCRA-LQG sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

An online review and analysis by MATRIX NEW WORLD ENG.,INC. of the RCRA-SQG list, as provided by EDR, has revealed that there are 11 RCRA-SQG sites within approximately 0.125 miles of the target property.

State and tribal registered storage tank lists

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

An online review and analysis by MATRIX NEW WORLD ENG.,INC. of the NY UST list,
as provided by EDR, has revealed that there are 6 NY UST sites
within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

CBS Number: 2-000204:
Facility Status: Unregulated/Closed:

NY AST: The Aboveground Storage Tank database contains registered ASTs. The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database.

An online review and analysis by MATRIX NEW WORLD ENG.,INC. of the NY AST list, as provided by EDR, has revealed that there are 39 NY AST sites within approximately 0.125 miles of the target property.

NY CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

An online review and analysis by MATRIX NEW WORLD ENG.,INC. of the NY CBS AST list, as provided by EDR, has revealed that there are 2 NY CBS AST sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

An online review and analysis by MATRIX NEW WORLD ENG.,INC. of the RCRA NonGen / NLR list, as provided by EDR, has revealed that there are 95 RCRA NonGen / NLR sites within approximately 0.125 miles of the target property.

TSCA: The Toxic Substances Control Act identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site. The United States Environmental Protection Agency has no current plan to update and/or re-issue this database.

An online review and analysis by MATRIX NEW WORLD ENG.,INC. of the TSCA list, as provided by EDR, has revealed that there is 1 TSCA site within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

ICIS: The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

An online review and analysis by MATRIX NEW WORLD ENG.,INC. of the ICIS list, as provided by EDR, has revealed that there are 14 ICIS sites within approximately 0.125 miles of the target property.

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

An online review and analysis by MATRIX NEW WORLD ENG.,INC. of the HIST FTTS list, as provided by EDR, has revealed that there are 3 HIST FTTS sites within approximately 0.125 miles of the target property.

US AIRS: The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

An online review and analysis by MATRIX NEW WORLD ENG.,INC. of the US AIRS list, as provided by EDR, has revealed that there are 17 US AIRS sites within approximately 0.125 miles of the target property.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

An online review and analysis by MATRIX NEW WORLD ENG.,INC. of the FINDS list, as provided by EDR, has revealed that there are 167 FINDS sites within approximately 0.125 miles of the target property.

NY SPDES: New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

An online review and analysis by MATRIX NEW WORLD ENG.,INC. of the NY SPDES list, as provided by EDR, has revealed that there are 7 NY SPDES sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

NY COOLING TOWERS: This data includes the location of cooling towers registered with New York State. The data is self-reported by owners/property managers of cooling towers in service in New York State. In August 2015, the New York State Department of Health released emergency regulations requiring the owners of cooling towers to register them with New York State.

An online review and analysis by MATRIX NEW WORLD ENG.,INC. of the NY COOLING TOWERS list, as provided by EDR, has revealed that there are 98 NY COOLING TOWERS sites within approximately 0.125 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

An online review and analysis by MATRIX NEW WORLD ENG.,INC. of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

An online review and analysis by MATRIX NEW WORLD ENG.,INC. of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 15 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL 4/29/99 - Saccacio - Dave Perez called the hotline to update the DEC that a contractor was unwilling to wait for ConEd to conduct its cleanup. This contractor was going to pave over the spill. Called Dave and he gave name of the contractor as Tully Contractors. I contacted DEC (O'Connell) and called the ECO's. I gave Officer Fitzpatrick all the relevant information. Later Dave and Officer Fitzpatrick called both telling me the contractor backed off after Dave told them the Environmental Police was going to arrest him. Con ed e2mis notes: L. Williams reports that his vehicle tank is ruptured and also his oil pan his truck spilled 20 gal's of gasoline and 6 qts of oil onto sand an soil E/S west st 200'N/O reade st did not enter any water way or sewer. He put down pads and its contained will start the clean up. Tatekawa and Fontanez assign to do clean up. All state vendor assign to clean up job by ERT Perez. Regan reports clean up was completed by all state Enviro. Clean up was complete at 19:00 hrs. They took 20 55 gallon drums of solid debri from the site. Clean up is complete. "

Remarks: "A VEHICLE STRUCK A ROCK AND STARTED TO LEAK THE ABOVE SPILL ONTO THE

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Summary Details:

Conditions at listing September 1983): The Hudson River PCBs Site is a 40-mile stretch of the Hudson River between Mechanicville and Fort Edward, New York. General Electric Co. discharged an estimated l.l million pounds of PCBs into this stretch of river. The State has identified 40 hot spots, defined as sediments contaminated with greater than 50 parts per million ppm) of PCBs. Also included in the site are five remnant areas, which are river sediments exposed when thelevel of the river was lowered due to removal of the Fort Edward Dam. The State has taken initial measures to stabili e the remnant areas from erosion. In September 1980, Congress passed an amendment to the Clean Water Act CWA) that included the Hudson River PCB Reclamation Demonstration Project. Under this legislation, the EPA Administrator could authori e a 75 percent grant, not to exceed 20 million. EPA issued a final Environmental Impact Statement in October 1982 evaluating

GE HUDSON RIVER SEDIMENT REMEDIATION PROCESSING AND TRANSPOR (Continued) 1000384273

various dredging alternatives for a demonstration project. EPA has prepared a feasibility study to evaluate alternative remedial actions under CERCLA. The Administrator has determined that CERCLA funds may be used for remedial action atthe remnant areas and for evaluating the effectiveness of the water supply system at Waterford, New York. Status June 1984): EPA has completed a draft feasibility study identifying alternatives for remedial action. A search for partiespotentially responsible for wastes associated with the site has been completed, and EPA has sent letters to two potentially responsible parties notifying them of possible legal action under CERCLA.

Environmental Interest/Information System:

NYC BD OF ED - NEW STUYVESANT HIGH SCH (Continued) **1004761337**

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.
AIR MINOR
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Tank Info:

Tank Number: 001
Tank Id: 61135
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

K00 - Spill Prevention - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring
J02 - Dispenser - Suction Dispenser
C03 - Pipe Location - Aboveground/Underground Combination
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating

STUYVESANT HS (NEW) -MANHATTAN M477 (Continued) **A100178413**

I04 - Overfill - Product Level Gauge (A/G)
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
L00 - Piping Leak Detection - None
E00 - Piping Secondary Containment - None
G02 - Tank Secondary Containment - Vault (w/access)

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 01/01/1992
Capacity Gallons: 10000
Tightness Test Method: NN

DEC Memo:	"3/17/14 TJD Teleconference with Richard Stumbo (914.906.4155) from Environmental Maintenance Contractors -he states a sump pit at base of stairwell F has accumulated petroleum product believed to be #2 heating oil. Mr. Stumbo reports (2) previous spills at this location

STAIRWELL F (Continued) **S116553584**

1208616 & 1308899 - he states both above spill numbers are associated with a large Hurricane Sandy related discharge due to significant flooding. A sample of the product was reported to have been collected on 3/7/14 - sample results are as follows: TPH - 150,000 ppm PCB's - negative Halogens - negative Upon further discussion Mr. Stumbo reports he has an open active case (1308899) at this property with DEC and has plans to perform a geoprobe investigation which will include the area affected by newly reported spill. DEC reporting requirements were reviewed with caller as were appropriate sampling methods. Spill has been closed and cross-referenced to Spill #1308899, currently managed by Doronova."

Remarks: "Samples came positive for #2 Oil. Clean up is pending sump pit pump out."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO 10/9/03 tipple spoke with Ms.Chen, she will send the phase 1, phase 2, and all documentation produced thus far on this site. site scheduled for redevelopment/////// 10/21/03 TJD Subsurface investigation report submitted by Airtech Environmental. Report indicates SVOC contaminiation identified in central-eastern portiion of property. A mercury exceedances also noted in same area. DeMeo sent letter requiring a work plan to remediate TAGM exceedances. 4/29/04 TJD Work plan submitted by Airtek Environmental reviewed and approved. 8/24/05 IAB 4/10/06 - Raphael Ketani. I received a call from Lisa Garcia of the Attorney General's Office (212) 416-8484. She said that the owners of the site are suing the DEC in an attempt to obtain tax benefits under the brownfield cleanup program. She said that she would be at the office tomorrow and would need to see the Spills file on this case. I told her I will try to locate the files and make them available. 4/13/06 - Ian Beilby File was transferred to DEC DEE as requested by Deb Christian. 7/10/2006 Transferred back to Region 2 - Parked at Mulqueen Above mentioned workplan asked that soil be removed within 30 days. The site has since been excavated and

377 GREENWICH ST (Continued) **S106125909**

the soils were removed as part of a redevelopment project; the construction of an 18 story hotel and restaurant. This has been confirmed by regional staff. Spill was closed out as per the Spill Classification and Response Priority System memo dated 4/28/92 for a Category E spill, ie. investigation indicates there was no spill. "

Remarks: "CALLER CALLING BACK AFTER TESTING AT ABOVE HAS LAB RESULTS SHOWING SVOC CONTIMINATION CALLER HARD TO UNDERSTAND CALL HER FOR MORE INFO IF NEEDED"

Update By:	dcwalsh

Site Description: "This Site consists of approximately 10,080 square feet of vacant land previously occupied by a two-story parking garage. Garage was demolished in 1991 and the Site has been utilized as a parking lot since then. The site is surrounded by residential buildings. Phase I was conducted in July 2003, and a Phase II Investigation was conducted in July 2004. Results indicate low levels of metal contamination. Applicant has demolished the parking lot and is conducting soil removal for construction of a hotel. The Site will be occupied by the hotel/restaurant building. Building includes construction of 80-room hotel and 100-seat restaurant consisting of approximately 60,000 sf. After careful review, the Department determined that this site was not eligible for the BCP. "

Env Problem: "Site soils exihibit low levels of metal contamination. Test pits indicate presence of two 500-gallon tanks. Site groundwater is being investigated."

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "DEC Piper received call off hours. A message was placed into the caller though no return call received. DEC Piper dispatched secondary to inspect. 1/13/2016: Rashad Responded to site on 1/12/16 with DEC DeMeo we met with super Sonny and Executive Chef of Palms restaurant Mona James. Grease trap from restaurant is located in next door parking garage utility room. Grease trap overflowed on Sunday and was called in on 1/12. I observed greasy/oil mixture traveling down parking garage collected in zipper drains which led to an ejector sump pump. They had a contractor on site power washing cont however it was ending up in the sump pump. We advised them off pumps and get a vac truck to pump out pit. The restaurant usually gets the grease trap cleaned every quarter however due to change of payment the last grease trap service was in August of 2015. Speaking with the doorman and front desk employee for the building there were odor complaints however no odor was present during site visit. A and L recycling did initial clean up however a company named Environmental Services usually cleans trap. DEP was notified that there may have been a potential impact to the city sewer systems. Sonny Velovic (building super): sonnyvela@gmail.com Mona James: mjames@thepalm.com, 646-395-6396, 646-395-6393 3:45pm: Received email from Mona with pictures showing clean sump pit and vac truck that was used. Pictures will be uploaded to D2. 1/14/2016: Rashad Showed photos to DEC DeMeo, sump pit is cleaned spill will be closed. "
Remarks: "Grease overflowed from the restaurant's grease trap into a garage located at 120 warrant st. No clean up at this time. Caller would like to remain anonymous."

DEC Memo:	"8/1/13 TJD Received request from Frank Franco of LIRO Engineers regarding required documenation necessary to close spill file. E-mail outling DEC requirements was provided (E-DOCS). 8/2/13 TJD File review. All required closure documentation has been received. Rusted clamps on an underwater heat pump (closed loop) system failed causing a discharge of 100 gallons of a 22% propylene glycol/water mixture to surface waters. System was repaired and placed back in service. Impacts to surface water were minimal and unrecoverable. No further action is required. Spill closed. "

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "DEC Piper spoke wiht Debbie. Tanks are unregistered. They are filling out paperwork and will be submitting it shortly. 9/16/13-Vought-Received call from Greg Collins (GC Environmental Ph:631-206-3700) and tanks have been registered (PBS #2-612088) and there are two double walled fiberglass tanks that failed system tests. Gaskets changed for two manways for each tank and they performed piping tests and fill and vents for both tanks failed. They reconnected suction and return lines and the systems passed the tests. Fill is double walled and he is requesting that they open up sidewalk and test secondary containment to rule out fill pipe as a source for both tanks. Vought spoke with DEC Zelinski and he noted that destination of leaking oil must be noted from fill line and GC Collins noted that any spill from fill would go back into sump for tank. Zielinksi also noted that fill line must be replaced as well and GC Collins noted that it indeed would be. DEC Demeo out on vacation for week and as such Vought provided approval that if tighntness test on secondary containment of fill lines passes then no subsurface investigation at that location is needed.
9/30/13-Vought-Received call from GC Robert Ott and he has preliminary test results and he noted that with primary and secondary walls people at Crompco cannot certify line as inside line has break in it. Crompco noted that they could provide result letter and Ott requesting conference call or futher guidance. Vought provided contact info for DEC Demeo to Ott. 10/23/13-Vought-Received call from Robert Ott and he has caps on both ends of secondary line and test his complete and he will be submitting report to Demeo. 11/14/13 TJD File review. Closure report received from GCE - spill cause was determined to be leaking underground fill line(s) in secondary containment (double wall). Piping is associated with (2) 10K Diesel UST's. As per above notes the secondary piping was tightness tested by Cromco and passed - those lines were then abandonned in place. Subsequent to the this activity a new set of double wall fill/vent lines were installed. Two leaking manway gaskets were reported to have been replaced and following all above work the entire system was then tested for tightness and passed (Cromco). All required documentation is support of spill closure has been received. No further action is required. Spill closed."
Remarks: "2 tanks failed test. Investigat repairs and further is pending."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Contact Name: MATTHEW SADOCHA
DEC Memo: "Obligado - I called Brooks Range. No answer. Left message to call back the DEC. Obligado - I spoke with Mr. Matt Sadocha who is the building manager. He said they had an overfill in the subbasement of a 2000 gal diesel tank. The diesel tank is used for the emergency generating system. The delivery was 1500 gallons by castle oil. There was approximately 400 gallons in the tank pre delivery according to Matt. The oil came up out of the top of the tank. The delivery company left prior to Mr. Sadocha discovering the spill. According to Matt, the spill is contained in the vault. The vault is approximately 7 ft by 30 ft. Oil is coating the vault floor is approximately 1/2 inch deep. He said he has been in touch with several contractors to do the cleanup but has not come to a decision yet. He was waiting for a call back from one contractor. I asked if there were odors in the building, and he said no. I asked if there were any sumps in the tank room, and he said no, the spill is contained. I followed up with Mr. Sadocha to inquire about where exactly the product over flowed, because typically, product overflos out of the vent whistle onto the street. He said that the vent line goes up to the roof. But there is also a whistle at the top of the tank where the product overflowed. 1/21/15 TJD File review. Overfill of 2K AST in basement of federal building. All product contained in tank vault. Preferred/Branch/AARCO all involved in various stages of product recovery, cleanup and waste disposal. A total of (4) drums of waste (2 drums solids and 2 drums liquids) were generated, transported and properly disposed of during the remedial process. Contractor reports the cause of overfill was a broken wire on the overfill alarm which was subsequently repaired. All closure documentation has been uploaded to DECDOCS. No further action is required. Spill closed."
Remarks: "overfill - cleanup pending -"

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance

ALEXANDER HAMILTON CUSTOM HOUSE (Continued) **1001029217**

information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "11/28/18 - Lakhani During a construction project at the address, generators were being used. One of the tanks for the generators overflowed with diesel through the fill and impacted the sidewalk and the street. Approx. 50 gallons of diesel overflowed. No soil was impacted, however two (2) sewer drains were affected. DEP was notified. FDNY is on site. Cushman and Wakefield, who manages the property for Citi, and Ken's Marine are performing the cleanup. Absorbents and boom are being used to prevent further impact to the drains. Absorbent mats were laid on the concrete to absorb the 12/13/18-Lin-Spill cleaned up. Recieved complete manifest. Ca closed. hiram.llanes@citi.com"
Remarks: "contained to concrete and sewer drain clean up is in progress"

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
AIR SYNTHETIC MINOR
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants.

RITZ CARLTON HOTEL (Continued) **1016062424**

AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking

Hazardous Waste Summary:
Waste Code: D000
Waste Description: Not Defined

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
AIR SYNTHETIC MINOR
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 1
Tank Id: 62994
Material Code: 0008
Common Name of Substance: Diesel

Equipment Records:

L00 - Piping Leak Detection - None
G01 - Tank Secondary Containment - Diking (Aboveground)
J02 - Dispenser - Suction Dispenser
E00 - Piping Secondary Containment - None
I02 - Overfill - High Level Alarm
D02 - Pipe Type - Galvanized Steel
F01 - Pipe External Protection - Painted/Asphalt Coating
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
C01 - Pipe Location - Aboveground
H05 - Tank Leak Detection - In-Tank System (ATG)

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 01/01/1987
Capacity Gallons: 4000
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of

FORMER RITE AID #10534 (Continued) **1015754378**

Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
AIR SYNTHETIC MINOR

DEC Memo: "10/30/12- Robert Crossen -Mac Hudson has two vac trucks operating as oil water sep. No electric, still feet of water with less than an inch of surface oil to go . However they have got down to a shallow part of the basement and have done a good job with speedy dry inside and out. Contact is John Migul 347 426 8817. PBS #2-265330 says Property Mgt is S L Green Mgt 212-425-5360 Office is located at room 343 17 Battery Place. Oil company on pbs is NOT servicing the building now 10/30/12-Hiralkumar Patel. visited site. met with Frank, on-site building representative. Frank mentioned that the building is 36 story high with three level parking garage in basement. the building is owned by two companies and managed by two management companies. the building is divided in residential (from 19th to 36th floor) and commercial (from ground to 18th floor). there are 500 apartments in residentail section. at the time of inspection, most of the residents left the building before storm, but few occupants were in building, and they were leaving also as there is no power in building. no odors noted in front lobby. Frank mentioned that there are two 25,000 gal heating oil tank in third level of basement (boiler is also in third level of basement) and owned/operated by commercial section of the building. he had nobody's contact number as electronic system and cell phones were down. during inspection, met with approved oil technician who came to inspect the site. spoke with Vinny at Approved Oil (718-238-1050). Vinny mentioned that they do service other buildings owned by Moinian Group, who is partial owner of the subject site. but Approved Oil does not service the subject site. Vinny had no further information. found oil/water on sidewalk and street. found about 4 ft high oil stains on building walls/fence/signs/poles in neighbourhood for multiple blocks, all the way to World Trade Center construction site also. inspected building 21 West St, which is located just north of building 17 Battery Place. building crew was pumping oil and water from four elevator pits. as per the crew member, oil/water entered into their elevator pits from neighbouring site. asked them to turn off the pumps as oil was being discharged onto the street. after consultation with DEC Austin, allowed pumping operation from the bottom of the pit to remove water only. met with Raymond Cardinale from Rose Associates, Inc. Rose Associates was hired by building 21 West St. informed Ray that the Department allows pumping of water only from the impacted pits, but no oil. asked him to monitor the discharge and stop pumping if oil noticed at the discharge. site 21 West st has one aboveground tank in

17 BATTERY PLACE (Continued) **S108413168**

vault with access and tank/boiler are located on ground floor. there is no baseent in building 21 West St. Raymond Cardinale Rose Associates, Inc. **contractor for 21 West St** Ph. (212) 328-5529 Fax (212) 634-5523 email: rcardinale@rosenyc.com inspected building 20 West St, building on east side of the 17 Battery Place. only water in basement and no oil. met with ConEd people, who were pumping water out from coned vaults on west sidewalk of Washington St. no oil in coned vaults. spoke with Gabriel Dagan at Moinian Group. informed him about the spill. asked him to hire contractor to remove oil/water from the basement. they have hired EMC and contractor can start work tomorrow morning. Gabriel Dagan Moinian Group Ph. (917) 669-2022 email: gabriel@moiniangroup.com Eilen New Mark Ph. (917) 941-0579 10/31/12-Hiralkumar Patel. visited site. met with Richard Stumbo and Jeff from EMC, Dean Virello, Chief Engineer for New Mark (who manages commmercial section), Ray Spampinato from NYC OEM and Chung Huang from OSHA. EMC brought a 6,500 gal vac truck. they started skimming oil from top of the water, but operation was stopped as oil spread in pockets and there is no access to the rear part of the basement.
also, there is no power and deep water in rear part so inspection of the rear part of the basement was impossible. after consulting with DEC Austin, asked Mr. Virello to start pumping water from bottom. also asked him to contain and collect free phase product, before it gets to pump or stick to building material as water level going down. they will arrange for pumps. (212) 620-3200 Fax (212) 620-4121 email: huang.zhao-hong@dol.gov around 6:45 PM, Richard call and informed that pump supplies were diverted to NYU Hospital by NYPD. they will arrange for other pumps tomorrow morning. 11/01/12-Hiralkumar Patel. alternate addresses: 1-17 West St, 17 Battery Place, 2-26 Washington St, 1 Western Union Plaza PBS #: 2-265330. as per PBS record, the site has two 20,000 gal #4 oil AST in contact with soil. the tanks were installed in Sep. 1959. other spills: 9515986, 9515989, 0501586, 0910825 11/20/12-Hiralkumar Patel. visited site. met Francis from EMC and Ron Schales from TMC Environmental. there are two 25,000 gal #4 oil ASTs at the site. the tanks were located on saddles, but displaced during storm. as per management, there was total of 25,000 gal oil in both tanks before storm. currently, there is still some oil/water in tanks and will be pumped out next week, once tanks are stable. oil/water from remaining area has been removed. Ron Schales TMC Environmental Ph. (508) 966-6003 (O) (774) 244-6616 (C) Fax (508) 966-4861 email: rschales@tmcenvironmental.com 11/26/12-Hiralkumar Patel. 4:42 PM:- received email from Thomas Clark (TClark@hazmatt.com) from TMC Environmental. he mentioned that tanks were pumped out on 11/23/12. he mentioned that tank 1 was turned upside down and was empty and tank 2 was turned about 90 degrees and contained about 7,600 gal water and 400 gal oil. 12/05/12-Hiralkumar Patel. 12:20 PM:- received message from Richard. 12/06/12-Hiralkumar Patel. 11:07 AM:- left message for Richard. 12/11/12-Hiralkumar Patel. DEC Austin heard

17 BATTERY PLACE (Continued) **S108413168**

petroleum odor complaints on radio. he asked to follow up. 9:24 AM:- spoke with Allen at EMC. he will ask Rich to call back. 9:27 AM:-spoke with Mr. Virello, chief engineer. he mentioned that there are two generators running on street (one for building and one for Duane Reade-commercial tenant on ground floor), which could be result of odors which noted outside the building, but there is no odors inside the building. 9:31 AM:- received call from Rich. he mentioned that residential tenants are back in building and they were complaining about petroleum odors since last week. due to these complaints, NYC DOH inspector visited site in middle of last week and found no issues throughout the building. DOH inspector visited boiler room in third level basement also and found no problems. Rich mentioned that EMC is doing 12 hour air monitoring (7 AM to 7 PM) 7 days a week. they monitored all levels of residential unit, ground floor and all three basement levels and found no readings on PID. they have removed all oil impacted material, except fire proofing material from 3rd level basement, which will be removed by middle of next week. asked Rich to provide copy of DOH inspection report. 12/28/12-Hiralkumar Patel. 11:22 AM:- received call from Rich. he mentioned that fire proofing removal project is in progress. currently, property owners are in process of hiring contractor to remove residual product from tanks and restore the tanks. Rich will submit schedule once available from hired contractor. air monitoring will continue. asked him to check elevators also for any odors. he mentioned that no more odors complaints from tenants. 12/31/12-Hiralkumar Patel. 10:40 AM:- received email from Rich confirming discussion on 12/28/12. 01/16/13-Hiralkumar Patel. 2:08 PM:- received message from Rich. he mentioned that property owner has hired boiler company for cleanup operation in tank rooms. he will submit work schedule, by next week, once available. 01/30/13-Hiralkumar Patel. 11:23 AM:- received call from Rich. tank room will be cleaned in two weeks. asked him to call for inspection, once tanks are stable and rooms are free of debris. 02/13/13-Hiralkumar Patel. 3:54 PM:- received call from Rich. tanks have been secured and tank rooms are mostly clean. site inspection can be possible on 02/28/13. Rich will call back by 02/25/13 to confirm the site inspection. 03/19/13-Hiralkumar Patel. 10:23 AM:- received call from Rich. he mentioned that cleanup is completed and will submit closure report soon. 03/21/13-Hiralkumar Patel. 4:53 PM:- received email from Allan from EMC including closure report. based on available information, case closed."

Remarks: "pbs # 2-265330 - two 20,000 gal oil storage tanks ruptured - pbs says #2 oil Report from OEM says 4 block radius is covered in oil at street level."

DEC Memo: "12-5-13 Spoke with Rich. He says spill is at 17 Battery Pl in Manhattan. He believes what he found today is related to 1207616, reported in relation to Sandy. Rich says his lead was Kumar Patel. I advised him to contact Kumar to discuss. Rich cell 914/906-4155. Corrected information to reflect actual spill location. Will edoc pdf of initial report if system lets me. Sent email to Kumar. jc 12/05/13-Hiralkumar Patel. 2:12 PM:- spoke with Rich. he mentioned that while renovating the bottom most floor of parking garage, where the oil tanks are located, crew found oil underneath the floor concrete. Rich mentioned that there are two layers of slab mostly in area where the oil tanks are located. he mentioned that the existing slab is about 2-4 inches thick, then about 12-14 inches of backfill material and then another concrete slab in bottom. free product found between two layers of concrete. as per building engineer, there was an old spill in area, probably in 1920/30s. Rich has collected some oil sample for analysis. he will submit sample results for review. he is planning to install some recovery wells around tanks. asked him to submit a work plan with site map including location of proposed recovery wells. Newmark Knight Frank 17 Battery Place, Suite 343 New York, NY 10004 Attn.: Richard Franco **property manager** Ph. (212) 425-5360 email: rfranco@newmarkkf.com Richard Stumbo EMC (Environmental Maintenance Contractors) Ph. (914) 232-7355 (O) (914) 906-4155 (C) Fax (914) 232-7357 email: rstumbo@enviromain.com 02/03/14-Hiralkumar Patel. 12:55 PM:- received email from Allan Ciriaco from EMC including preliminary report. abstract: - twenty (20) test borings (TW-1 through TW-20) were advanced to a depth of

17 BATTERY PL (Continued) **S103517622**

approx. 18 to 20 inches below the sub-basement flooring surface - oil type product was identified in 13 test borings: TB-1, TB-5, TB-6, TB-9, TB-10, TB-11, TB-12, TB-13, TB-14, TB-15, TB-16, TB-17 and TB-18 - no product was identified in TB-2, TB-3, TB-4, TB-7, TB-8, TB-19 and TB-20 - found PID readings between 187 ppm in TB-1 and 597 ppm in TB-17 ---------- - collected water sample from the trough that runs at the perimeter of the sub-basement and collects groundwater which is pumped into the sewer system - no contamination noted in groundwater samples - collected suspected oil product from the area of puddle for TPH analysis - product analysis shows mixture of diesel fuel and an unidentified oil ---------- - installed five (5) recovery wells (RW-1 through RW-5) - oil product pumped out from wells RW-1, RW-2, RW-4 and RW-5 - no product found in RW-3 - source of the oil appears to be due to past release of oil product from within the fuel oil tank rooms 02/06/14-Hiralkumar Patel. 2:I1 PM:- spoke with Rich and discussed location of recovery wells. due to possibility of oil migration into the ground via recovery wells RW-4 and RW-5, if on-site tanks start leaking, asked Rich to seal recovery wells inside tank rooms. based on findings of free phase product all around both tanks, informed Rich that the department requires further delineation of contamination which may include installation of monitoring wells on West Street sidewalk. Rich will discuss with property owner and will submit plan. he mentioned that as per building owner/management, oil spill occurred in tank rooms in 1970s and that could be the source of recent findings of oil. discussed with DEC Austin. due to findings of free phase product underneath building slab and no possibility of remediation via excavation, case needs to be transferred to remediation. 2:48 PM:- sent email to DEC Austin requesting case transfer to remediation. 02/06/2014: This spill case was transferred to A. Doronova. - AD Received the following e-mail summary from K. Patel: Hiralkumar Patel 2/6/2014 2:48 PM spill #: 1308899 site: 17 Battery Place (1 West Street), Manhattan During Hurricane Sandy, three sub-grade parking garages (with tank/boiler rooms in lowest level) at the site were filled with oil and water due to spill from the two 25,000 gallon #2 oil ASTs. The both tanks were shifted from its position. After cleanup and necessary repairs, both tank systems were back in-service and spill was closed. In Nov. 2013, building crew found oil on sub-basement floor, outside the tank rooms. During further investigation, free phase petroleum product (mixture of diesel and unidentified oil) was observed around the on-site tanks. Contractor has installed five recovery wells in sub-basement and has pumped out oily product during multiple monitoring events. There is no possibility of remediation via excavation. Please see attached map showing locations where free phase product was found. Will review. AD DEC Remarks from Spill #1311743 (closed and cross-referenced) to active spill. 3/17/14 TJD Teleconference with Richard Stumbo (914.906.4155) from Environmental Maintenance Contractors -he states a sump pit at base of stairwell F has accumulated petroleum product believed to be #2 heating oil. Mr. Stumbo reports (2) previous spills at this location 1208616 & 1308899 - he states both above spill numbers are associated with a large Hurricane Sandy related discharge due to significant flooding. A sample of the product was reported to have been collected on 3/7/14 - sample results are as follows: TPH - 150,000 ppm PCB's - negative Halogens - negative Upon further discussion Mr. Stumbo reports he has an open active case (1308899) at this property with DEC and has plans to perform a geoprobe investigation which will include the area

17 BATTERY PL (Continued) **S103517622**

affected by newly reported spill. DEC reporting requirements were reviewed with caller as were appropriate sampling methods. Spill has been closed and cross-referenced to Spill #1308899, currently managed by Doronova. Location has multiple addresses. 04/15/2014: Spoke with Mr. Stumbo. He said that they prepared report, and it will be submitted to DEC next week. AD 05/01/2014: Received an e-mail from Mr. Stumbo with 2 attached reports. Will review. AD 06/05/2014: Reviewed the Preliminary Subsurface Investigation Report. It states that Environmental Maintenance Contractors, Inc. (EMC) has performed a Preliminary Investigation at the site. The actions included a physical site inspection, the collection of an oil type product for analysis and the pump out of the confirmed oil product at the above referenced project location. The work performed was in response to an unknown release of oil product observed within a sump pit located in the basement level of Stairwell F at 2-26 Washington Street (a.k.a. 17 Battery Place North, NYC, NY). On March 6, 2014, EMC dispatched a Project Manager to the site to perform a site inspection for what appeared to be an oil type product in the sump pit at the Subject Site. On March 7, 2014, EMC mobilized an Environmental Technician (ET) to the site to collect a sample of the suspect oil type product (Sample# 1). The sample was containerized in a glass jar, recorded, packaged and delivered to a NYS DOH accredited/approved laboratory with a certified chain of custody for analysis via Total Petroleum Hydrocarbons (TPH), PCB s Halogens, Flashpoint and Ignitability. On March 17, 2014, EMC received laboratory data for the sample collected and confirmed that the product observed at the Subject Site is likely to be a #2 fuel oil product. EMC contacted the NYSDEC Spill Hotline to make notification of a product release. The NYS DEC assigned the spill to the existing spill in the sub-basement fuel tank room - NYS DEC Spill Case #13-08899. On March 20, 2014, EMC Mobilized a NYSDEC Certified Vacuum Truck to vacuum/pump out the oil product from the sump pit. Approximately 1,000 gallons of oil product were skimmed off the top of the water within the sump pit. The product vacuumed/pumped was properly transported and dispose of off site. At the completion of the pump out of the sump pit only an oil type sheen was observed on top of the water. On March 24, 2014,EMC re-visited site to perform a site condition inspection. Based on the inspection only sheen was observed on top of the water in the sump pit. Conclusion of the report: Based on interview with the building staff and the assessment services performed, the source of the pumped out oil is unknown. EMC states that it is possible that the source of the oil contamination may have originated from the oil spill that occurred during the storm Sandy in October of 2012 NYS DEC Spill Number 1207616. Recommendations: EMC recommends that the sump pit continue to be monitored to determine if any oil recovery or recharging occurs. EMC also recommends that groundwater monitoring wells be installed on the West Side of the building to determine if the source of the oil contamination is from off site. Please see attached sketch indicating the proposed location of the groundwater monitoring wells. The said sketch is mising in the report. AD 06/10/2014: Reviewed Preliminary Subsurface Report dated April 8, 2014. It states that the performed investigation included the following: - Performing subsurface test borings; - Cleanup of oil type product on the concrete floor slab; - Installation of oil recovery wells; - Pump out of oil from the recovery wells; - Transport and disposal of recovered oil. EMC s Environmental Technician (ET) completed sub-surface test borings (TB) at the site,(TB-1 through TB-20) utilizing a hand held boring device.

17 BATTERY PL (Continued) **S103517622**

Test borings were advanced to a depth of approximately 18 to 20 inches below the concrete floor slab. On January 4, 2014 and January 31, 2014, EMC Hazmat Personnel were on site to perform a cleanup due to water intrusion at the Subject Site. The cleanup included the collection of oil and oil contaminated water caused by the overfilling of the Recovery Wells with water during the water intrusion. The oil and oil contaminated water were collected and placed into 55 gallon drums. Recovery Well Installation: EMC completed the installation of Oil Recovery Wells (RW) #1, #2, #3, #4 and #5. EMC s ET monitored and performed field testing during installation of RW utilizing a MultiRae Multi Gas Analyzer equipped with a PID to screen for volatile organic compounds and screen the air quality. Findings & Observations: Based on the observations made while performing the Subsurface Test Borings, an oil type product was observed at locations TB #1, #5, #6, #9, #10, #11, #12, #13, #14, #15, #16, #17 and #18. No product was identified in TB #2, #3, #4, #7, #8, #19 and #20. Based on the observations made upon completion of the install of the Recovery Wells, an oil type product was being recovered on a consistent basis within in Recovery Wells #1, #2 #4 and #5. Recovery Well #4 and #5 have been sealed/closed. An oil type product continues to be recovered in RW #1 and #2. No product has been observed in Recovery Well #3. Conclusion: It has been determined based on the field activities performed that there is an unknown quantity of confirmed oil type product beneath the concrete slab at the Subject Site, particularly within the Fuel Tank Rooms. The source of the oil appears to be due to a past release of oil product from within the Fuel Oil Tank Rooms. Recommendations: EMC recommends that the recovery wells continue to be pumped out and observations made of any visible oil containing product within. The oil pump out will be performed on a weekly basis until the site conditions improve. During each pump out, EMC's ET will record observations made including visible presence of product and the total quantity of product pumped out. EMC proposes advancement of soil borings and the installation of groundwater monitoring wells on the perimeter of the property (sidewalk along West Street) to delineate the extent of the contamination and to determine if the oil product has moved off site. Soil screening and sampling would be performed during the soil borings and groundwater samples would be screened and collected at the site. The consultant proposes that additional recovery wells be installed in the basement to determine if the plume under the slab is larger than anticipated. If any oil is recovered in the additional recovery wells then the wells would continue to be observed and pumped of any visible product. To verify number of the proposed wells. Called and spoke with Mr. Stumbo of EMC. In total seven recovery well will be installed at the site. Two outside wells and five basement wells. Will discuss the site with J. Kolleeny of DEC. Sent an e-mail to Mr. Stumbo with a request for RP's contact info. AD 06/12/2014: Received the following e-mail from mr. Stumbo; Owner Representative is Attn: Mr. John Mehmedovic Ocean Prime LLC Douglass Elliman Property Management 1 West Street New York City, NY 10004 Email: johnm@moiniangroup.com Tele: 347-426-8817 Richard Stumbo, President Issued a WP approval letter to Mr. Mehmedovic. AD 08/07/2014: Received a phone call from EMC. I was informed that they were not able to install two outside wells along West street due to the utility lines locations. Told Mr. Stumbo to install some wells inside the tank rooms, and to extend these wells above the floor line in order to avoid cross-contamination from the possible tank leakage

17 BATTERY PL (Continued) **S103517622**

in the future. EMC will install these wells next week. AD 08/14/2014: received the following e-mail from Mr. Stumbo: Ainura the building ownerships bank needs confirmation that the two areas of work are included under the spill case number referenced in the subject of this email. Can you confirm in writing that the NYS DEC Spill Case number 13-08899 relates to the two spills reported including the 17 Battery North, NYC Stairwell F Basement and the 17 Battery, NYC Sub 2 Basement where the fuel storage tanks are stored. Thank you. Richard Stumbo, President Environmental Maintenance Contractors, Inc. (EMC) 5 Anderson Lane Goldens Bridge, NY 10526 Cell: 914-906-4155 Reviewed the file for both spill cases. later in the day issued the following e-mail: Dear Mr. Stumbo, By this correspondence, the Department confirms that NYSDEC Spill No. 1311743 associated with the property listed on 2-26 Washington Street, New York, has been closed by DEC on March 17, 2014 and consolidated with Spill No. 1308899, currently managed by me. Sincerely, Ainura Doronova AD 09/05/2014: Received the call from EMC. I was told that EMS installed two recovery wells in the tank rooms. During installation of 5 recovery wells in the garage EMC encountered refusal. Depth of the borings were 15' and no soil was encounted, just concrete. Suggested to do primary borings to the east of recovery wells with free product (RW-1 and RW-2) to determine the extent of the free product plume, and if free product and soil contamination will be detected to install recovery wells. Also recommeded to install more recovery wells in the tank rooms to expedite product removal. AD 09/30/2014: Received a phone call from EMC. They installed two more wells in the tank room and one well in the garage. EMC plans to sample a sump in the area of Stairwell F Basement. A report will be submitted to DEC. AD 10/22/2014: Received the following e-mail from EMC: Ainura, Please find attached Staircase F- Sump pump pit closure report for Spill# 13-08899 17 Battery Place, New York City. Should you have any question or additional required information please don t hesitate to give us a call. Sincerly, Environmental Maintenance Contractors, Inc. (EMC) 5 Anderson Lane Goldens Bridge, New York 10526 Ph: 914-232-7355 Fax: 914-232-7357 www.enviromain.com Will review. AD 12/10/2014: Received a phone call from EMC. They performing weekly free product recovery from the six site wells. Requested to compile data into quarterly monitoring reports for submission to DEC. AD 04/30/2015: Called and spoke with Mr. Stumbo. Requested quarterly report submissiom. Mr. Stumbo said that it will be submitted next week. AD 05/22/2015: Received Free Product Recovery Report. Will review. AD 06/26/2015: Reviewed the report. It states that EMC performed at the site the following actions: Ground Penetrating Radar (GPR): On August 7, 2014, EMC coordinated with Ground Penetrating Radar System, Inc. (GPRS) to perform a GPR Survey to inspect and provide safe locations to perform soil borings and install groundwater monitoring wells at the sidewalk of West Street in New York City, NY. Based on the GRP inspection/survey performed by GRPS at the sidewalk of West Street in New York City, GPRS observed that multiple electrical vaults, gas valves and water valves were present. In addition to the utilities and electrical vaults, it was determined that the foundation/cellar of the building extended out into the sidewalk area. Installation of Oil Recovery Wells: EMC Completed the installation of 5 additional oil recovery wells (RW#4, RW#5, RW#6, RW#7 and RW#8) within the fuel tank room & adjacent parking garage located in the sub-sub basement, as per the recommendation of the NYS DEC case managers. EMC s ET monitored and performed field testing during installation of RW

17 BATTERY PL (Continued) **S103517622**

utilizing a MultiRae Multi Gas Analyzer equipped with Photo Ionization Detector (PID) to screen for airborne Volatile Organic Compound s (VOC s). Free product recovery: For the period from April 2014 to April 2015, 19 oil recovery events were performed at the site. Based on the most recent field observation made on April 20, 2015, Free Product/Oil is still observed within the 6 recovery wells (RW#1, #2, #4, #5, #6, & #7). Conclusion: It has been determined that there are no areas on the sidewalk of West Street, that safe and clear for drilling due to the heavy utility congestion combined with the presence of the electrical vaults and the building foundation/cellar. According to EMC, based on the field activities performed, that there is an unknown quantity of free product/oil beneath the concrete slab at the Subject Site, particularly within the Fuel Tank Rooms. The source of the oil appears to be due to a past release of oil product from within the Fuel Oil Tank Rooms. Recommendations: EMC recommends that the recovery wells continue to be pumped out of any visible oil containing product within. The oil pump out should be performed on a monthly basis until the site condition improve. During each pump out, EMC's ET shall note observations made including visible presence of product and the total quantity of product pumped out. A report of our findings will be prepared and submitted to the NYS DEC Case Manager on a quarterly basis for their review. Will approve the recommendation. AD 07/08/2015: Issued and sent a letter approving monthly LNAPl recovery. AD 09/01/2015: Received a Product Recovery Report. Will review. AD 10/09/2015: Reviewed the report. It states that scope of work performed at the site for the period from May to August 2015 consisted in pumping out of oil from the site recovery wells on a regular basis: May 7, 2015: Environmental Maintenance Contractors, Inc. (EMC) HazMat personnel pumped out approximately 75 gallons of free product/oil with contaminated water from RW #7, #2, #4, #5, #t5, & #7. No product was observed in RW #3 and RW#8 (dry). May 14, 2015: EMC Mobilized a NYSDEC Certified Vacuum Truck to vacuum/pump out the oil with contaminated water from the 51-gallon drums generated during the pump out of the Recovery Wells. Approximately 275 gallons of oil product was pumped out and properly transported and disposed of off site. Please see Attachment for the waste Manifest for the oil waste vacuumed/pumped at the Subject Site. June 25, 2015: Environmental Maintenance Contractors, Inc. (EMC) HazMat personnel pumped out approximately 40 gallons of free product/oil with contaminated water from RW #I, #2, #4, #5, #t5, & #7. No product was observed in RW #3 and RW#8 (dry). July 21, 2015: Environmental Maintenance Contractors, Inc. (EMC) HazMat personnel pumped out approximately 60 gallons of free product/oil with contaminated water from RW #1, #2, #4, #5, #t5, & #7. No product was observed in RW #3 and RW#8 (dry). August 13, 2015: Environmental Maintenance Contractors, Inc. (EMC) HazMat personnel pumped out approximately 50 gallons of free product/oil with contaminated water from RW #1,#2,#4,#5,#6,#7 & #8. No product was observed in RW #3. Findings & Observations: Based on the most recent field observation on August 73, 2075, Free Product/Oil r,vas still observed within the Recovery Wells (RW#I, #2,#4,#5,#6,#1 &#B). Conclusion: Based on the field activities performed, there is an unknown quantity of freer product/oil beneath the concrete slab at the Subject Site, particularly within the Fuel Tank Rooms. The source of the free product/oil appears to be due to a past release of oil product from within the Fuel Oil Tank Rooms. Recommendations: EMC recommends that the site recovery wells continue to be pumped out of

17 BATTERY PL (Continued) **S103517622**

any visible oil containing product within. The oil pump-out should be performed on a monthly basis until the site conditions improve. During each pump-out, ,EMC's ET shall note observations made including the visible presence of free product/oil and the total quantity of free product/oil pumped out. EMC is scheduled to perform the next pump out event during the week of September 2I, 2015. AD 01/13/2016: Received Oil Recovery Report for the period from September to December 2015. Will review. AD 02/12/2016: Reviewed the report. It states that scope of work performed at the site for the period from September to December 2015 consisted in pumping out of oil from the site recovery wells on a regular basis: September 30, 2015: Environmental Maintenance Contractors, Inc. (EMC) HazMat personnel pumped out approximately 15 gallons of free product/oil with contaminated water from RW #1, #2, #4, #5, #6, & #7. No product was observed in RW #3 and RW #8. November 11, 2015: EMC s HazMat personnel arrived on site and was informed that the area was not accessible due to an emergency construction. No work was performed due to lack of access. December 3, 2015: EMC s HazMat personnel pumped out approximately 41.5 gallons of free product/oil with contaminated water from RW #1, #2, #4, #5, #6, & #7. No product was observed in RW #3 and RW #8. December 28, 2015: EMC Mobilized a NYSDEC Certified Waste Transporter to pick up, transport and properly dispose of four (4) 55 gallon drums of oil with contaminated water that was generated during the pump out of the Recovery Wells. Please see Attachment C for the Waste Manifest for the oil waste vacuumed/pumped at the Subject Site. Findings & Observations: Based on the most recent field observations made on December 3, 2015, Free Product/Oil was observed within the Recovery Wells - RW#1, #2, #4, #5, #6, & #7. Total quantity of product pumped from recovery wells for this period is - 56.5 gallons. Conclusion: Based on the field activities performed there is an unknown quantity of free product/oil beneath the concrete slab at the Subject Site, particularly within the Fuel Tank Rooms. The source of the free product/oil appears to be due to a past release of oil product from within the Fuel Oil Tank Rooms. Recommendations: EMC recommends that the Recovery Wells continue to be pumped out if any oil containing product is observed. The oil pump out should be performed on a monthly basis until the site conditions improve. During each pump out, EMC's ET shall note observations made including the visible presence of free product/oil and the total quantity of free product/oil pumped out. EMC is scheduled to perform the next pump out event during the week of January 11, 2016. 04/22/2016; Received the following e-mail from EMC: Ms. Ainura Doronova- Please find attached the Quarterly Report for the pump-outs at 17 Battery Place aka 1 West Street - Spill Case # 13-08899. You will also be recieving a hard copy in the mail. Should you have any question or required additional information please don t hesitate to give us a call. Sincerely, Amanda Cesario Environmental Maintenance Contractors, Inc. (EMC) 5 Anderson Lane Goldens Bridge, New York 10526 Ph: 914-232-7355 Fax: 914-232-7357 Email:acesario@enviromain.com www.enviromain.com Will review. AD 05/17/2016: Reviewed the report. It states that scope of work performed at the site for the period from January to March 2016 consisted in pumping out of oil from the site recovery wells on a regular basis: 1. January 27, 2016: Environmental Maintenance Contractors, Inc. (EMC) HazMat personnel pumped out approximately 89 gallons of free product/oil with contaminated water from wells RW#1, RW#2, RW#4, RW#5, RW#6, and RW#7. 2. March 3, 2016: Environmental

17 BATTERY PL (Continued) **S103517622**

Maintenance Contractors, Inc. (EMC) HazMat personnel pumped out approximately 7 gallons of free product/oil with contaminated water from wells RW#7, RW#4, & RW#8. Only sheen was observed in RW#1, RW#2, RW#3, RW#5 and RW#6. 3. March 26, 2016: Environmental Maintenance Contractors, Inc. (EMC) HazMat personnel pumped out approximately 9 gallons of free product/oil with contaminated water from wells RW#1, RW#2, RW#4, RW#5, RW#6 & RW#7. Only sheen was observed in RW#3 and RW#8. Findings & Observations: Based on the most recent field observations made on March 26, 2016, Free Product/Oil was observed within the 7 recovery wells RW#1, RW#2, RW#4, RW#4, RW#5, RW#6, & RW#7. Conclusion: Based on the field activities performed there is an unknown quantity of free product/oil beneath the concrete slab at the subject site, particularly within the fuel tank rooms. The source of the free product/oil appears to be due to a past release of oil product from within the fuel oil tank rooms. Recommendations: EMC recommends that the recovery wells continue to be pumped out if any oil containing product is observed. The oil pump out should be performed on a monthly basis until the site conditions improve. During each pump out, EMC's ET shall note observations made including the visible presence of free product/oil and the total quantity of free product/oil pumped out. EMC is scheduled to perform the next pump out event during the week of April 25, 2016. During this next event, EMC plans perform an exploratory sub surface investigation within the tank rooms, in order to determine if additional recovery wells are necessary. AD 10/06/2016: Received the following e-mail from Allan Ciriaco: Ms. Doranova, Please find atta for 17 Battery Place, NYC NY - Spill Case# 13-08899 for your review. Please confirm receipt. Sincerely, Allan Ciriaco, Vice President of Operations Environmental Maintenance Contractors, Inc. (EMC) Will review. AD 11/25/2016: Reviewed the report. It states that scope of work performed at the site for the period from July to September 2016 consisted in pumping out of oil from the site recovery wells on a regular basis: 1. July 23, 2016: Environmental Maintenance Contractors, Inc. (EMC) HazMat personnel pumped out approximately 7 gallons of free product/oil with contaminated water from RW#4, RW#5, RW#6, RW#7, and RW#9. 2. August 18, 2016: EMC HazMat personnel pumped out approximately 5 gallons of free product/oil with contaminated water from RW#4, RW#5, RW#6, RW#7, and RW#9. 3. September 9, 2016: Environmental Maintenance Contractors, Inc. (EMC) Environmental Field Technician (ET) were at the site to collect groundwater samples from RW-1, RW-2, RW-3 & RW-8. The groundwater samples collected were recorded, packaged and delivered to a New York State accredited/approved laboratory with a certified chain of custody for analysis via Volatile Organic Compounds (VOCs) via EPA Method 8260 and Semi-Volatile Organic Compounds (SVOCs) via EPA Method 8270. Groundwater samples were screened for VOCs utilizing a Photo Ionization Detector (PID). 4. September 22, 2016: EMC HazMat personnel pumped out approximately 5 gallons of free product/oil with contaminated water from RW#4, RW#5, RW#6, RW#7, and RW#9. Findings & Observations: Based on the most recent field observations made on September 22, 2016, free product/oil was observed within the recovery wells RW#4, RW#5, RW#6, RW#7 and RW#9. No free product/oil was observed within the Recovery Wells RW#1, RW#2, RW#3 and RW#8 during the last three pump-out events (July 23, 2016, August 18, 2016 and September 22, 2016). Based on the review of the groundwater sample results collected on September 9, 2016, the sample results indicate that recovery wells RW-1, RW-2, RW-3 & RW-8 have slightly elevated

17 BATTERY PL (Continued) **S103517622**

concentrations of contaminants exceeding the NYS DEC Water Quality Standard Guidance - Class GA Values. Based on the field activities performed, there is an unknown quantity of free product/oil beneath the concrete slab of the Sub-Basement at the Subject Site, particularly within the Fuel Tank Rooms. The source of the free product/oil appears to be due to a past release of oil product from within the Fuel Oil Tank Rooms. Recommendations: EMC recommends the closure of the Recovery Wells (RW#1, RW#2, and RW#3), as they are no longer generating free product/oil. The Recovery Well RW#8 will remain open for future groundwater sample collection. The Recovery Wells (RW#4, RW#5, RW#6, RW#7 and RW#9) should continue to be pumped out if any oil containing product is observed. The oil pump out should be performed on a monthly basis until the site conditions improve. During each pump out, EMC's ET shall note observations made including the visible presence of free product/oil and the total quantity of free product/oil pumped out. AD 12/29/2016: Received the following e-mail from Mr. Ciriaco: Ms. Doranova, We sent the quarterly report at your office via Fedex for 17 Battery Place, NYC NY - Spill Case# 13-08899 for your review. Please confirm when you received the report. Thank you and a Happy New Year. Sincerely, Allan Ciriaco, Vice President of Operations Environmental Maintenance Contractors, Inc. (EMC) AD 01/04/2017: Received the report. Will review. AD 01/09/2017: Received a phone call from Mr. Ciriaco. He asked if a meeting with DEC could be arranged due to RP's request. Gave him available dates for the meeting. AD 01/11/2017: The requested meeting was scheduled for January 17, 11:00 AM. AD 01/13/2017: Received a phone call from Mr. Ciricao that his client cannot attend the meeting on the date it was scheduled due to a change of plans. Send him an e-mail asking what dates they are looking for. AD 01/16/2017: Received an e-mail from Mr. Ciriaco, where he asked about scheduling a conference call instead of the meeting. It was scheduled on January 23, 2017. AD 01/20/2017: Reviewed the report. It states that scope of work performed at the site for the period from November to December 2016 consisted in pumping out of oil from the site recovery wells on a regular basis: 1. October 13, 2016: Environmental Maintenance Contractors, Inc. (EMC) HazMat personnel pumped out approximately 5 gallons of free product/oil with contaminated water from RW#4, RW#5, RW#6, RW#7, and RW#9. ECM personnel sealed/closed RW #2 and #3 as per the approval of DEC in accordance with NYSDEC Well Decommissioning Procedures. 2. October 20, 2016: EMC HazMat personnel pumped out approximately 5 gallons of free product/oil with contaminated water from RW#4, RW#5, RW#6, RW#7, and RW#9. ECM personnel sealed/closed RW #1 as per the approval of DEC in accordance with NYSDEC Well Decommissioning Procedures. 3. November 17, 2016: EMC HazMat personnel pumped out approximately 2.5 gallons of free product/oil with contaminated water from RW#4, RW#5, RW#6, RW#7, and RW#9. 4. December 15, 2016: EMC HazMat personnel pumped out approximately 1 gallons of free product/oil with contaminated water from RW#4, RW#5, RW#6, RW#7, and RW#9. EMC Mobilized a NYSDEC Certified waste Transporter to pick up, transport and properly dispose of 4 55-gallon drums of oil with contaminated water and 1 55-gallon drum of solid waste that was generated during the pump out activities of the recovery wells.

Findings & Observations: Based on the most recent field observations made on December 15, 2016, free product/oil was observed within the recovery wells RW#4 and RW#7. No free product/oil was observed within the Recovery Wells RW#5, RW#6, RW#7, RW#8 and RW#9 during this event.

17 BATTERY PL (Continued) **S103517622**

According to the consultant, there is an unknown quantity of free product/oil beneath the concrete slab of the Sub-Basement at the site, particularly within the Fuel Tank Rooms. The source of the free product/oil appears to be due to a past release of oil product from within the Fuel Oil Tank Rooms. Recommendations: The Recovery Wells (RW#4, RW#5, RW#6, RW#7 and RW#9) should continue to be pumped out if any oil containing product is observed. The oil pump out should be performed on a monthly basis until the site conditions improve. During each pump out, EMC's ET shall note observations made including the visible presence of free product/oil and the total quantity of free product/oil pumped out. AD 01/23/2017: Had a conference call with RP and Allan Ciriaco. We discussed ongoing remedial activities at the site, progress in LNAPL recovery and further actions. It was agreed that monthly free product recovery could continue at the site from all wells exhibiting LNAPL. Wells which exhibit only product sheen should be treated by installation of an absorbent socks. AD 04/24/2017: Received the following e-mail from Mr. Ciriaco: Ms. Doronova, Please find attached quarterly report for 17 Battery Place, NYC NY - Spill Case# 13-08899 for your review. Please confirm receipt. Sincerely, Allan Ciriaco, Vice President of Operations Environmental Maintenance Contractors, Inc. (EMC) Will review. AD 05/30/2017: Reviewed the report. It states that scope of work performed at the site for the period from January to march 2017 consisted in pumping out of oil from the site recovery wells on a regular basis: 1. January 19, 2017 Environmental Maintenance Contractors, Inc. (EMC) personnel pumped out appr. 2 gallons of free product/oil with contaminated water from RW#4, RW#5, RW#7, and RW#9. 2. February 23, 2017 EMC personnel pumped out appr. 5 gallons of free product/oil with contaminated water from RW#4, RW#6, and RW#7. 3. March 23, 2017 EMC personnel pumped out appr. 3 gallons of free product/oil with contaminated water from RW#4, RW#5, RW#6, RW#7, and RW#9. Based on the field observations made during EMC most recent site visit, March 23, 2017, free product/oil was observed within Recovery Wells RW#4, RW#5, RW#6, RW#7 and RW#9. No free product/oil was observed in Recovery Well RW#8. Recommendations: The consultant states that recovery wells should continue to be pumped of any oil containing product observed. The oil pump out should be performed on a monthly basis until the site conditions improve. During each pump out, EMC's ET shall note observations made including the visible presence of free product/oil and the total quantity of free product/oil pumped out. AD 07/13/2017: Received the following e-mail from Mr. Ciriaco: Ms. Doronova, Please find attached quarterly report for 17 Battery Place, NYC NY - Spill Case# 1308899 for your review. Please confirm receipt. Sincerely, Allan Ciriaco, Vice President of Operations Environmental Maintenance Contractors, Inc. (EMC) 5 Anderson Lane Goldens Bridge, New York 10526 Ph: 914-232-7355 Fax: 914-232-7357 Cell: 914-960-2925 email: aciriaco@enviromain.com www.enviromain.com Will review. AD 07/27/2017: Reviewed the report. It states that scope of work performed at the site for the period from April to June 2017 consisted in pumping out of oil from the site recovery wells on a regular basis: 1. April 20, 2017 Environmental Maintenance Contractors, Inc. (EMC) personnel pumped out appr. 6 gallons of free product/oil with contaminated water from five wells: RW#4, RW#5, RW#6, RW#7, and RW#9. 2. May 24, 2017 EMC personnel pumped out appr. 15 gallons of free product/oil with contaminated water from RW#4, RW#5, RW#6, RW#7, and RW#9. June 29, 2017 EMC personnel pumped out appr. 15 gallons of free product/oil with

17 BATTERY PL (Continued) **S103517622**

contaminated water from RW#4, RW#5, RW#6, and RW#7. Based on the field observations made during our most recent site visit, June 29, 2017, free product/oil was observed within Recovery Wells RW#4, RW#5, RW#6, and RW#7. No free product/oil was observed in Recovery Well RW#8 and RW#9. According to the consultant, there is an unknown quantity of free product/oil beneath the concrete slab in the Fuel Tank Rooms in the Sub-Basement at the Subject Site. The source of the free product/oil appears to be due to past releases of oil product in the Fuel Oil Tank Rooms. Recommendations: The consultant states that the recovery wells should continue to be pumped of any oil containing product observed. The oil pump out should be performed on a monthly basis until the site conditions improve. During each pump out, EMC's ET shall note observations made including the visible presence of free product/oil and the total quantity of free product/oil pumped out. EMC will install additional two (2) Oil Recovery Wells within the northern and southern directions to fully delineate the free product plume and expedite the Light Non-Aqueous-Phase Liquid (LNAPL) recovery, as per your email recommendation. EMC is scheduled to perform the next pump out event and installation of additional recovery wells on/or about July 27, 2017. AD 10/16/2017: Received the following report from Mr. Ciriaco: Ms. Doronova, Please find attached quarterly report for 17 Battery Place, NYC NY - Spill Case# 13-08899 for your review. Please confirm receipt. Sincerely, Allan Ciriaco, Vice President of Operations Environmental Maintenance Contractors, Inc. (EMC) 5 Anderson Lane Goldens Bridge, New York 10526 Ph: 914-232-7355 Fax: 914-232-7357 Cell: 914-960-2925 email: aciriaco@enviromain.com www.enviromain.com Will review. AD 11/29/2017: Reviewed the report. It states that scope of work performed at the site for the period from July to September 2017 consisted in pumping out of oil from the site recovery wells on a regular basis: July 20, 2017: Environmental Maintenance Contractors, Inc. personnel pumped out approximately 11 gallons of free product/oil with contaminated water from RW-4, RW-5, RW-6, RW-7, and RW-9. August 24, 2017: EMC HazMat personnel pumped out approximately 9.5 gallons of free product/oil with contaminated water from RW-4, RW-5, RW-6, and RW-7. September 28, 2017: EMC HazMat personnel installed two (2) additional Recovery Wells (RW-10 & RW-11) in the Fuel Tank Rooms. The additional Recovery Wells are installed within the Northern and Southern direction to fully delineate the free product plume and expedite Light Non-Aqueous-Phase Liquid (LNAPL) Recovery. EMC HazMat personnel pumped out approximately 40 gallons of free product/oil with contaminated water from RW-4, RW-5, RW-6, RW-7, RW-9, RW-10 & RW-11. Findings & Observations: Based on the field observations made during our most recent site visit, September 28, 2017, free product/oil was observed within Recovery Wells RW-4, RW-5, RW-6, RW-7, RW-9, RW-10 & RW-11. No free product/oil was observed in Recovery Well RW-8. Conclusion: There is an unknown quantity of free product/oil beneath the concrete slab in the Fuel Tank Rooms in the Sub Sub-Basement at the Subject Site. The source of the free product/oil appears to be due to past releases of oil product in the Fuel Oil Tank Rooms. Recommendations: The Recovery Wells should continue to be pumped of any oil containing product observed. The oil pump out should be performed on a monthly basis until the site conditions improve. During each pump out, EMC's ET shall note observations made including the visible presence of free product/oil and the total quantity of free product/oil pumped out. AD 01/17/2018: Received the following e-mail from Mr. Ciriaco: Ms. Doronova, Please

find attached quarterly report for 17 Battery Place, NYC NY - Spill Case# 13-08899 for your review. Please confirm receipt. Sincerely, Allan Ciriaco, Vice President of Operations Environmental Maintenance Contractors, Inc. (EMC) 5 Anderson Lane Goldens Bridge, New York 10526 Ph: 914-232-7355 Fax: 914-232-7357 Cell: 914-960-2925 email: aciriaco@enviromain.com www.enviromain.com Will review. AD 01/18/2018: Spoke with Mr. Ciriaco over the phone. He asked what further actions could be done at the site. Suggested to install two more wells in the tank room to completely delineate free product plume. AD 02/16/2018: Reviewed the report. It states that the following activities were performed at the site during the reported period: October 26, 2017: EMC HazMat personnel pumped out approximately 15 gallons of free product/oil with oil contaminated water from RW-4, RW-5, RW-6, RW-7, RW-9, RW-10 & RW-11. November 30, 2017: EMC HazMat personnel pumped out approximately 10 gallons of free product/oil with oil contaminated water from RW-4, RW-5, RW-7, RW-10 & RW-11. December 21, 2017: EMC HazMat personnel pumped out approximately 21 gallons of free product/oil with oil contaminated water from RW-4, RW-5, RW-7, RW-9, RW-10 & RW-11. December 22, 2017: EMC mobilized a NYSDEC Certified Waste Transporter to pick up, transport and properly dispose of three (3) - 55 gallon drums of free product/oil with oil contaminated water and one (1) - 55 gallon drum of solid waste that was generated during the installation of Recovery Wells and pump out of Recovery Well. Drums were properly packed, transported and disposed off site. Findings & Observations: Based on the field observations made during our most recent site visit, December 21, 2017, free product/oil was observed within recovery wells RW-4, RW-5, RW-7, RW-9, RW-10 & RW-11. No free product/oil was observed in Recovery Wells RW-6 & RW-8. Conclusion: There is an unknown quantity of free product/oil beneath the concrete slab in the fuel tank rooms in the sub sub-basement (P2 Level) at the subject site. The source of the free product/oil appears to be due to past releases of oil product in the fuel tank rooms. Recommendations: The recovery wells should continue to be pumped of any oil containing product observed. The oil pump out should be performed on a monthly basis until the site conditions improve. During each pump out, EMC's ET shall note observations made including the visible presence of free product/oil and the total quantity of free product/oil pumped out. EMC is scheduled to perform the next pump out event on/or about January 25, 2018. 04/10/2018: Received an e-mail from Mr. Ciriaco: Ms. Doronova, Our Client wants to set up a conference call with you regarding NYS DEC Spill Case # 1308899 for 17 Battery Place (a.k.a 1 West Street), New York, NY. Can you give us several dates and time this week that works best for you? Sincerely, Allan Ciriaco, Vice President of Operations Environmental Maintenance Contractors, Inc. (EMC) 5 Anderson Lane Goldens Bridge, New York 10526 Ph: 914-232-7355 Fax: 914-232-7357 Cell: 914-960-2925 email: aciriaco@enviromain.com www.enviromain.com Called and scheduled the conference call for 11:00 AM on April 11th, 2018. AD 04/11/2018: Received the following e-mails from Mr. Ciriaco: Ms. Doranova, Please find attached quarterly report for 17 Battery Place, NYC NY - Spill Case# 13-08899 for your review. We will call you at 11 AM today for the conference call with our Client. Please confirm receipt. Sincerely, Allan Ciriaco, Vice President of Operations Environmental Maintenance Contractors, Inc. (EMC) 5 Anderson Lane Goldens Bridge, New York 10526 Ph: 914-232-7355 Fax: 914-232-7357 Cell: 914-960-2925 email: aciriaco@enviromain.com www.enviromain.com Sent confirmation e-mail to Mr. Ciriaco. 11:00 AM

17 BATTERY PL (Continued) **S103517622**

- I had a conference call with Mr. Ciriaco and his client regarding progress status of the site remediation. The RP had his concerns regarding the speed of the remediation and how much time it could take. Told him that the plume of the free product had shrunken over the time and is now localized to tank rooms. Explained that the only quick solution to remediate the site is to remove the USTs and excavate the contaminated soil which could not be feasible due to the depth of the USTs and surrounding footprint of the building foundation. Suggested to install two more wells in the southern tank room, and to place absorbent socks in the wells in the northern tank room. Mr. Ciriaco will discuss further actions with the RP and get back to us. AD 07/26/2018: Received the following e-mail from Mr. Ciriaco: Ms. Doranova, Please find attached quarterly report for 17 Battery Place, NYC NY - Spill Case# 13-08899 for your review. Please confirm receipt. Sincerely, Allan Ciriaco, Vice President of Operations Environmental Maintenance Contractors, Inc. (EMC) 5 Anderson Lane Goldens Bridge, New York 10526 Ph: 914-232-7355 Fax: 914-232-7357 Cell: 914-960-2925 email: aciriaco@enviromain.com Will review. AD 08/22/2018: Reviewed the report. It states that the following activities were performed at the site for the stated period: April 27, 2018 Environmental Maintenance Contractors, Inc. (EMC) HazMat personnel pumped out approximately 11 gallons of free product/oil with oil contaminated water from RW-4, RW-5, RW-6, RW-7, RW-10 & RW-11. No free product/oil was observed in RW-8 & RW-9 during the time of the pump out. May 31, 2018 EMC HazMat personnel pumped out approximately 20 gallons of free product/oil with oil contaminated water from RW-4, RW-7, RW-10 & RW-11. Oil absorbent pads were used to remove oil sheen from RW-5 & RW-9. No free product/oil was observed in RW-6 & RW-8 during the time of the pump out. June 21, 2018 EMC HazMat personnel pumped out approximately 16 gallons of free product/oil with oil contaminated water from RW-4, RW-7 & RW-11. Oil absorbent pads were used to remove oil sheen from RW-5 & RW-6. No free product/oil was observed in RW-8, RW-9 & RW-10 during the time of the pump out. Findings & Observations: Based on the field observations made during our most recent site visit, June 21, 2018, free product/oil was observed within Recovery Wells RW-4, RW-5, RW-6, RW-7 & RW-11. No free product/oil was observed in Recovery Wells RW-8, RW-9& RW-10. Conclusion: There is an unknown quantity of free product/oil beneath the concrete slab in the Fuel Tank Rooms in the Sub Sub-Basement (P2 Level) at the Subject Site. The source of the free product/oil appears to be due to past releases of oil product in the Fuel Oil Tank Rooms. Recommendations: The Recovery Wells should continue to be pumped of any oil containing product observed. The oil pump out should be performed on a monthly basis until the site conditions improve. During each pump out, EMC's ET shall note observations made including the visible presence of free product/oil and the total quantity of free product/oil pumped out. AD 11/05/2018: Received the following e-mail from Mr. Ciriaco: Ms. Doronova, Please find attached quarterly report for 17 Battery Place, NYC NY - Spill Case# 13-08899 for your review. Please confirm receipt. Also the Owners Representative is asking if the spill case can be close based on the location of the closest residential floor being 22 floors above. Should you have any questions or additional required information please don t hesitate to give us a call. Sincerely, Allan Ciriaco, Vice President of Operations Environmental Maintenance Contractors, Inc. (EMC) 5 Anderson Lane Goldens Bridge, New York 10526 Ph: 914-232-7355 Fax: 914-232-7357 Cell: 914-960-2925 email:

aciriaco@enviromain.com www.enviromain.com Will review. AD 12/17/2018: Reviewed the report. It states that the following scope of work was performed at the site for the reported period: July 26, 2018: - Environmental Maintenance Contractors, Inc. (EMC) HazMat personnel pumped out approximately 14 gallons of free product/oil with oil contaminated water from RW-4, RW-7 & RW-11. Oil absorbent pads were used to remove oil sheen from RW-5, RW-6 & RW-9. No free product/oil was observed in RW-8 & RW-10 during the time of the pump out. August 30, 2018: - EMC HazMat personnel pumped out approximately 12.5 gallons of free product/oil with oil contaminated water from RW-4, RW-7 & RW-11. Oil absorbent pads were used to remove oil sheen from RW-5, RW-6 & RW-9. No free product/oil was observed in RW-8 & RW-10 during the time of the pump out. September 20, 2018: - EMC HazMat personnel pumped out approximately 5 gallons of free product/oil with oil contaminated water from RW-11. Oil absorbent pads were used to remove oil sheen from RW-4, RW-6, RW-7 & RW-10. No free product/oil was observed in RW-5, RW-8, & RW-9 during the time of the pump out. Findings & Observations: Based on the field observations made during the consultant's most recent site visit on September 20, 2018, free product/oil was observed within Recovery Wells RW-4, RW-6, RW-7, RW-10 & RW-11. No free product/oil was observed in Recovery Wells RW-5, RW-8 & RW-9. Conclusion: There is an unknown quantity of free product/oil beneath the concrete slab in the Fuel Tank Rooms in the Sub Sub-Basement (P2 Level) at the Subject Site. The source of the free product/oil appears to be due to past releases of oil product in the Fuel Oil Tank Rooms. Recommendations: According to the consultant, the Recovery Wells should continue to be pumped of any oil containing product observed. The oil pump out should be performed on a monthly basis until the site conditions improve. During each pump out, EMC's ET shall note observations made including the visible presence of free product/oil and the total quantity of free product/oil pumped out. AD 01/09/2019: Received the following e-mail from : Ms. Doronova, Please find attached quarterly report for 17 Battery Place, NYC NY - Spill Case# 13-08899 for your review. Please note that the Ownership would like to discontinue the work being performed, including the maintenance and pump out of the recovery wells installed at 17 Battery, New York, NY and allow for natural attenuation to take over. Please let us know what you think about this. Should you have any questions or additional required information please don t hesitate to give us a call. Sincerely, Allan Ciriaco, Vice President of Operations Environmental Maintenance Contractors, Inc. (EMC) 5 Anderson Lane Goldens Bridge, New York 10526 Ph: 914-232-7355 Fax: 914-232-7357 Cell: 914-960-2925 email: aciriaco@enviromain.com Will review. AD 01/16/2019: Received a phone call from Mr. Ciriaco. He wanted to discuss the site status and owner's decision to discontinue LNAPL recovery. Explained to Mr. Ciriaco that spill cannot be closed at this time due to the persisting free product presence in the several site wells. If the pumping out the wells is not cost effective, then different recovery methods should be employed at the site. Mr. Ciriaco asked for an official response. AD 01/22/019: Reviewed the report. It states that the following activities were performed at the site for the reporting period: October 25, 2018: Environmental Maintenance Contractors, Inc. (EMC) HazMat personnel pumped out approximately 7.5 gallons of free product/oil with oil contaminated water from RW-4, RW-6, RW-7, RW-10 & RW-11. No free product/oil was observed in RW-5, RW-8 & RW-9 during the time of the pump out. November 29, 2018: EMC HazMat personnel

17 BATTERY PL (Continued) **S103517622**

pumped out approximately 16 gallons of free product/oil with oil contaminated water from RW-4, RW-5, RW-6, RW-7, RW-10 & RW-11. No free product/oil was observed in RW-8 & RW-9 during the time of the pump out. EMC Mobilized a NYSDEC Certified Waste Transporter to pick up, transport and properly dispose of two (2) - 55 gallon drums of free product/oil with oil contaminated water and one (1) - 55 gallon drum of solid waste that was generated during the pump out of Recovery Wells. Drums were properly packed, transported and disposed off site. December 27, 2018: EMC HazMat personnel pumped out approximately 17 gallons of free product/oil with oil contaminated water from RW-4, RW-5, RW-6, RW-7, RW-10 & RW-11. No free product/oil was observed in RW-8 & RW-9 during the time of the pump out. Findings & Observations: Based on the field observations made during our most recent site visit on December 27, 2018, free product/oil was observed within Recovery Wells RW-4, RW-5, RW-6, RW-7, RW-10 & RW-11. No free product/oil was observed in Recovery Wells RW-8 & RW-9. Conclusion: There is an unknown quantity of free product/oil beneath the concrete slab in the Fuel Tank Rooms in the Sub Sub-Basement (P2 Level) at the Subject Site. The source of the free product/oil appears to be due to past releases of oil product in the Fuel Oil Tank Rooms. Recommendations: The Recovery Wells should continue to be pumped of any oil containing product observed. The oil pump out should be performed on a monthly basis until the site conditions improve. During each pump out, EMC's ET shall note observations made including the visible presence of free product/oil and the total quantity of free product/oil pumped out. EMC is scheduled to perform the next pump out event on/or about January 24, 2019. 01/24/2019: Sent the following e-mail to Mr. Ciriaco: Dear Mr. Ciriaco, The Department had reviewed the quarterly report for the above-referenced site. The report states that six site wells continue to exhibit # 6 oil. Due to its high viscosity the natural attenuation approach will not work. The spill case cannot be closed until free product is present at the site. The responsible party should continue site remediation utilizing more cost effective remedial approaches if needed. If you would like to discuss this matter further, DEC can schedule a meeting. Please feel free to contact if you have question regarding this matter. Sincerely, Ainura Doronova - Environmental Engineer AD 04/30/2019: Received the following e-mail from Mr. Ciriaco: Ms. Doranova, Please find attached quarterly report for 17 Battery Place, New York, NY - Spill Case# 13-08899 for your review. Please confirm receipt. Should you have any questions or additional required information please don t hesitate to give us a call. Recommendations: The Recovery Wells should continue to be pumped of any oil containing product observed. The oil pump out should be performed on a monthly basis until the site conditions improve. During each pump out, EMC's ET shall note observations made including the visible presence of free product/oil and the total quantity of free product/oil pumped out. EMC is scheduled to perform the next pump out event on/or about February 27, 2019. AD 06/17/2002: Received the following email from Mr. Ciriaco: Ms. Doronova, Please find attached status report for 17 Battery Place, New York, NY - Spill Case# 13-08899, dated 6/8/2020 for your review. Please confirm receipt. Also our client is asking for a conference call with you. Let us know when are you available. Sincerely, Allan Ciriaco, Vice President of Operations Environmental Maintenance Contractors, Inc. (EMC) 5 Anderson Lane Goldens Bridge, New York 10526 Ph: 914-232-7355 Fax: 914-232-7357 Cell: 914-960-2925 email: aciriaco@enviromain.com www.enviromain.com Will review. AD 06/19/2020: Reviewed the report. It states that the following activities were performed at the site for the reported period: - February 27, 2020 Environmental Maintenance Contractors, Inc. (EMC) HazMat personnel pumped out approximately 14 gallons of free product/oil with oil contaminated water from RW-4, RW-7 & RW-11. No free product/oil was observed in RW-5, RW-6, RW-8, RW-9 & RW-10 during the time of the pump out. - May 28, 2020 Environmental Maintenance Contractors, Inc. (EMC) HazMat personnel pumped out approximately 16 gallons of free product/oil with oil contaminated water from RW-4, RW-7 & RW-11. No free product/oil was observed in RW-5, RW-6, RW-8, RW-9 & RW-10 during the time of the pump out. Findings & Observations: Based on the field observations made during our most recent site visit on May 28, 2020 free product/oil was observed within Recovery Wells RW-4, RW-7 & RW-11. No free product/oil was observed in Recovery Wells RW-5, RW-6 RW-8, RW-9 & RW-10 for over a year. Conclusion: There is an unknown quantity of free product/oil beneath the concrete slab in the Fuel Tank Rooms in the Sub Sub-Basement (P2 Level) at the Subject Site. The source of the free product/oil appears to be due to past releases of oil product in the Fuel Oil Tank Rooms. Recommendations: EMC recommends the closure of the Recovery Wells RW-5, RW-6, RW-8 and RW-9, as they are no longer generating free product/oil. The Recovery Well RW-10 will remain open for future groundwater sample collection. The Recovery Wells should continue to be pumped of any oil containing product observed. The oil pump-outs should be performed on a quarterly basis until the site conditions improve. During each pump out, EMC's ET shall note observations made including the visible presence of free product/oil and the total quantity of free product/oil pumped out. EMC is scheduled to perform the next pump out event on/or about August 27, 2020. AD 06/22/2020: Received the following email from Mr. Ciriaco: Ms. Doronova, Thank you for confirming receipt of the report. Our client/Owner representative want a conference call with you. Let us know when are you available so we can set it up. Sincerely, Allan Ciriaco, Vice President of Operations Environmental Maintenance Contractors, Inc. (EMC) 5 Anderson Lane Goldens Bridge, New York 10526 Ph: 914-232-7355 Fax: 914-232-7357 Cell: 914-960-2925 email: aciriaco@enviromain.com AD

17 BATTERY PL (Continued) **S103517622**

06/24/2020: Sent an email to Mr. Ciriaco, tentatively scheduling the requested conference call for Thursday, June 25th, 2020. AD 06/25/2020: Had a conference call at 1:30 PM with Eileen Vahey and John Mehmedovic of Moinian Group (RP representatives) and Richard Stumbo of EMC (their consultant). Discussed current situation at the site with free product. I was asked by the RP if the spill can be closed if no free product will be detected in all site wells for the first time. Responded that it should be several consecutive events with no FP reappearance to consider spill case closure. Since there are positive trend in shrinking of free product plume, suggested to increase FP recovery frequency from quarterly to monthly to expedite cleanup. This suggestions was taken positively by the RP. Also requested to rewrite recommendations from the last report and to submit them to me for approval. AD 07/07/2020: Received the following email from Mr. Ciriaco; Ms. Doronova, Please find attached letter of recommendation for 17 Battery Place, New York, NY - NYS DEC Spill Case 13-08899 for your review. Please confirm receipt. Thanks Sincerely, Allan Ciriaco, Vice President of Operations Environmental Maintenance Contractors, Inc. (EMC) 5 Anderson Lane Goldens Bridge, New York 10526 Ph: 914-232-7355 Fax: 914-232-7357 Cell: 914-960-2925 Will review. AD 07/15/2020: Reviewed the recommendations. EMC recommends the following: - Closure of the Recovery Wells # RW-5, RW-6 RW-8 and RW-10, as they have not generating free product/oil for more than one year. The proposed Recovery Wells will be closed/decommissioned in accordance with the NYS DEC Well Decommissioning Procedures (CP-43). - The Recovery Well # RW-9 has not generated free product/oil for more than one year; however it will remain open for future assessment and groundwater sample collection as per NYS DEC requirements/recommendation. - The Recovery Wells # RW-4, RW-7 and RW-11 are still generating visible free product/oil and will continued to be pumped out and assessed. The free product/ oil recovery pump-out event will be performed on a monthly basis until the site conditions improve. Will send an approval letter. AD 07/28/2020: Issued and sent a recommendations approval letter to Mr. J. Mehmedovic of Monian Group. AD 11/24/2020: Received the following email from Mr. Ciriaco: Ms. Doronova, Please find attached status report, dated 10/28/2020 for 17 Battery Place, New York, NY - NYS DEC Spill Case 13-08899 for your review. Please confirm receipt. Sincerely, Allan Ciriaco, Vice President of Operations Environmental Maintenance Contractors, Inc. (EMC) 5 Anderson Lane Goldens Bridge, New York 10526 Ph: 914-232-7355 Fax: 914-232-7357 Cell: 914-960-2925 email: aciriaco@enviromain.com www.enviromain.com Will review. AD 12/10/2020: Reviewed the report. It sates that the following scope of field work was performed at the site for the reported period: - July 23, 2020: Environmental Maintenance Contractors, Inc. (EMC) HazMat personnel pumped out approximately 21 gallons of free product/oil with oil contaminated water from recovery wells RW-4, RW-7 & RW-11. No free product/oil was observed in recovery wells RW-5, RW-6, RW-8, RW-9 & RW-10 during the time of the pump out. - August 19, 2020: EMC HazMat personnel pumped out approximately 18 gallons of free product/oil with oil contaminated water from recovery wells RW-4, RW-7 & RW-11. No free product/oil was observed in recovery wells RW-5, RW-6, RW-8, RW-9 & RW-10 during the time of the pump out EMC HazMat personnel decommissioned/closed out recovery wells RW-5, RW-6, RW-8 & RW-10 as per the letter of recommendation letter approval by the NYS DEC Case Manager dated, July 28, 2020 and in accordance with the NYS DEC Well

17 BATTERY PL (Continued) **S103517622**

Decommissioning Procedures (CP-43). - September 24, 2020: EMC HazMat personnel pumped out approximately 14 gallons of free product/oil with oil contaminated water from RW-4, RW-7 & RW-11. No free product/oil was observed in RW-9 during the time of the pump out. - October 22, 2020: EMC HazMat personnel pumped out approximately 14 gallons of free product/oil with oil contaminated water from RW-4, RW-7 & RW-11. No free product/oil was observed in RW-9 during the time of the pump out. Findings & Observations: Based on the field observations made during our most recent site visit on October 22, 2020, free product/oil was observed within Recovery Wells RW-4, RW-7 & RW-11. No free product/oil was observed in Recovery Wells RW-9. Conclusion: There is an unknown quantity of free product/oil beneath the concrete slab in the Fuel Tank Rooms in the Sub Sub-Basement (P2 Level) at the Subject Site. The source of the free product/oil appears to be due to past releases of oil product in the Fuel Oil Tank Rooms. Recommendations: The Recovery Wells should continue to be pumped of any oil containing product observed. The oil pump-outs should be performed on a monthly basis until the site conditions improve. During each pump out, EMC's ET shall note observations made including the visible presence of free product/oil and the total quantity of free product/oil pumped out. EMC is scheduled to perform the next pump out event on/or about November 19, 2020."

DEC Memo: "e2mis no. 158483: At 15:45 Construction Management inspector V. Costantino #49002 reported that at 14:30 his contractor crew working on a Public Improvement job broke out what they thought was an abandoned water main and it turned out to be an abandoned gas main. 5 gallons of drip water spilled out of the pipe into the soil of the excavation. Costantino reports he called the Chem Lab to take samples. Gas Construction Planner J. Deluca #46490 was notified at 15:55 to have crew respond for clean up. 21:04 Warren Miller reports NY State Project Representative Jonathan Chan was on location. EPA ID# NYP004131264. 07/07/05 @ 11:10 - As per Gino Frabasile, Project Specialist CM- EHS; At the request of DEC, pre excavation and post excavation samples were take (CC # DD04558; EE05191). The soil was classified non hazardous contaminated. Total of seven 55 gallon drums of waste was generated and was picked up Astoria Transportation for disposal. Clean up complete. 08/03/05 @ 15:34 - The waste was disposed of as Benzene contaminated waste. Post clean up samples indicated no contamination. The results were received on May 16, 2005. The spill is being closed."
Remarks: "During excavation of a water main pipe, cut into a gas pipe thinking it was the water main, spilled drip water containing above material. no to the 5 ?'s"

DEC Memo: "2/1/17 - Obligado - Desk Duty - I called the USCG regarding this incident and USCG Officer Gugenheimer stated that they have correlated this sheen incident to the Hudson Transmission Partners Dielectric Fluid Spill #1608225. He said the USCG is not currently responding to this report. Sheen Size Length: 300 FEET Sheen Size Width: 10 FEET Sheen Color: RAINBOW As per Randall Austin, close and consolidate this spill with 1608225. 02/01/17-Hiralkumar Patel. discussed with DEC Andre. informed him that leak associated with spill #: 1608225 is in area near W 90th Street and there is no report of sheen from 90th St to lower manhattan. 3:36 PM:- spoke with Gadi Zofi at Ken's Marine, contractor working for Hudson Transmission Partners. Gadi mentioned that Ken's Marine has boats on-site and have not observed any product/sheen on water at the suspected leak location near W 90th St. 3:42 PM:- spoke with Coast Guard to confirm information about source of sheen. Coast Guard stated that this sheen incident is possibly related to dielectric fluid spill from ConEd's feeder cables at Newport Marina in NJ (spill #: 1606552) and not to leak from Hudson Tranmission's feeder cable (spill #: 1608225) near W 90th St. refer to spill #: 1606552. "

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was FOLEY Con Ed e2mis #133203 Notes: 9-5-00 75gal transformer oil in vault V2717. THe oil is up to the knees of the network protector switch and is bubbling. The oil is due to possible bottom leak in transformer. Sump pit cannot be verified. No sump pump. Drain is clogged. PCB historical data indicates 31ppm as of 12/20/99. Re-estimated the amount of oil spilled to 25gal. Lab results returned <1ppm PCB. Removed one drum of solid waste and transported it to the Industrial Waste Pit at W. 28th St. Removed 500gal oily water from vault and 500gal oil from transformer. Transformer plate indicates capacity is 525gal. Spread oil absorb on floor. Partial cleanup completed. Need to remove transformer to do final cleanup. 9-17-00 Cleanup completed. Transformer replaced. Removed accumulated rainwater from vault with tanker. Flushed and cleaned vault with flush truck, scrubbed walls and floor with slix degreaser and water, removed same with flush truck. Removed one drum of solid waste and transported it to W 28th St WOC Industrial Waste pit."
Remarks: "SAMPLES TO BE TAKEN. CLEAN UP WILL BE DONE. CON ED 133-203"

DEC Memo: "8/11/04: Call from Ed Wiederkehr (Con Ed Remediation) - he will be going to site tomorrow to meet with Construction Inspector (Barry Smerling 917-418-3211). According to Smerling, no oil was noted in initial excavation to 15 feet, and oil only started coming out when pile was at approx 45 feet below grade (pile is 30 feet long). Oil ID is cable oil. (JHO) ~~~~~~~~~~~~~~~~~~~~~~ e2mis no 154770 Dannela Contracting Co. was pile driving in open excavation and approx. 2 gallons of unknown oil begin to surface. At this point excavating was stopped. Also at this point Menechini states this pile is approx. 30 ft in. This spill is contained, and has been made safe, and Chem. Lab has been called and will be taking samples. He also notes that no oil-static lines have been damaged. Private property affected: Yes - Port Authority Property. **NEW INCIDENT NO. 154830** 08/17/04 @10:55 Jane O'Connell of the DEC called Barry Smerling on 08/16/04. She agrees with our clean-up plan including remediation of all visible oil and to dispose of the oil contaminated water/solids as non-haz oily waste. She requested that she be notified if any more oil surfaces. Further, she will close out the spill when she is notified by E2MIS that the transmission manhole is complete and remaining excavation is backfilled. 05/16/05 - As per Gino Frabasile, Project Specialist CM - EHS; Clean Ventures removed 3 cubic yard of soil and 19047 gallon of oily water. Manifest Numbers used are CVCC 0664 17, 0664 19, 0664 20, 0664 21, 0645 69. The work was compleated on 09/10/2004."
Remarks: "Approx 2 gallons of unknown oil. Spill is contained on soil and private property. "

Spiller Company: 001
Contact Name: MARK KOENING
DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL On November 16, 2001, DEC located and inspected the two 11,690-gallon underground storage tanks registered to Silverstein Properties at 7WTC. Upon access, both tanks were found to be full to almost capacity with fuel oil. On November 20, 2001, DEC and USEPA's contractor pumped approximately 19,000-gallons of fuel oil from the two tanks. Between March 27 and April 5, the two tanks were removed from the vaults. The tanks appeared to be in tact. The pea gravel surronding the western tank was impacted with oil from the former substation (ID's as Silicone Base Transformer oil) - possibly enterering through leak detection monitoring piping in four corners of vaults. Impacted pea gravel properly disposed. The vault appeared to be in good condition with tight walls, floor and joints. The bottom of the vault was below the wt, but no leakage was noted

7 WORLD TRADE CENTER (Continued) **S106469167**

entering the vault when left open for six days. Spill closed. June, 2002, excavated the concrete tank vaults for new construction. No evidence of impact to surrounding soils - soils typical of fill and contained brick, concrete, and clam shells. 02/24/03 TISHMAN AND SEASONS (SUB TO TISHMAN) ARE EXCAVATING FOR THE RECONSTRUCTION. Fourteen endpoint samples planned by Langan, Silversteins consultant. Excavation and endpoint sampling scheduled to be complete by mid-March. 7 samples collected to date, depths ranging from 1 to 32 feet below grade."

Remarks: "CALLER ATTORNEY FOR PROPERTY LEASEE'S AND STATES THAT THERE WERE UNDERGROUND STORAGE TANKS AT ABOVE LOCATION. CALLER REQUEST TO TO REGIONAL OFFICE."

DEC Memo: "e2mis 153451 J. Anderson # 01692 Supervisor of Substation Operations called to report a spill of sulfuric acid. It was discovered that while unpacking a tray of newly delivered 6 vt. batteries 2 of them had cracks in them and the tray was wet with the acid. They also found that the route that the batteries took from the loading bay to the 2nd floor battery room drips of acid had leaked out of the tray. She states that there is roughly 1 gallon of acid that had leaked out. Most of the acid is in the tray & drops along the way were onto concrete. She thinks maybe some onto soil; she will call back with verification. They have the trail roped off and will use the spill pack that is in the battery room intendid for these types of spills. At 18:00 J. Anderson called back and stated that a few drops had to have fallen onto soil. She has the MSDS sheets and the batteries contained lead, arsenic, sulfuric acid, calcium, & antimony. Also they found that the tractor trailor that was carryying the b was wet & some of the other cargo was also affected with the acid. 18:34 Update from J. Anderson - it was determined that the capacity of the two batteries may total 14 gallons of which the 5/18/04 18:48 J. Anderson called with an update that the batterier contain 10.81 gallons of acid each. J. Anderson called back to report that there is a third battery that they found empty for a total of 30 gallons. Update: May 19,2004 01:05 hrs Frank M Mangiamele reports that as of 12:45 hrs clean up is complete. Clean Harbors did clean up on VEH R-60627. The cleanup was completed at 00:55 hrs. on 5/19/04."
Remarks: "Acid is in the Trade Center Substation. In process of cleaning using a spill pack. Material on Concrete , few drops on soil, and some was in the vehicle that was delivering the batteries. Spill contained within substation. Batteries were damaged..Unsure if leak has stopped.*** Update- Tom Marcinek- 18:54 5/18/2004 Two batteries total involved.. full contents of each are empty... Total spilled is now 21.6 gal. Electrolyte solution inside each battery with 30% Sulfuric Acid solution. ********** NOW 32.4 GALLONS OF SULFURIC ACID ******"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO e2mis no. 151704: Tishman contractor spilled appox 15-20 gal of fuel oil at 12:40 hrs. from a container while lifting it up to fuel up crane. Private property affeced: Yes Building, Vehcile. ~~~~~~~~~~~~~~~~~~ 1/12/04, 1:20 PM: O'Connell rec'd inital call from Pat Keelan, Con Ed SSO that spill had occurred and that Tishman was being uncooperative in cleaning up. Spill has affected Con Ed equipment and street. 2:00 PM: O'Connell responded to scene with DeMeo. Con Ed Emergency Response (Tony Natale) and FDNY were on-scene. FDNY did not consider it to be a threat from fire perspective and left scene. Tishman has begun clean up - sand and absorbents spread on Barclay St. west of Greenwich. DeMeo to remain on-scene to direct clean up with Tishman. Transferred from O'Connell to DeMeo. (JHO). 1/13/04 TJD Site inspected 1/13/04. Petroleum impacts on Barclay Street between Greenwich and West St. Roadway impacts addressed by Tishman workers whom applied absorbents and swept roadway. Inside construction fencing, on southside of Barclay there is additional petroleum contamination on ground including stone/soils in area approximately 15 x 30 feet wide. (4) vehicles

7 WORLD TRADE CENTER (Continued) **S106125273**

including (2) belonging to Con Edison were sprayed by diesel fuel. On 6th floor steel deck (directly beneath crane) there is pooling of diesel between flutes of corrugated steel decking. Tishman was directed to use absorbents pads to wipe down steel decking. Also observed was a wood loading platform off 3rd floor that was impacted from release. Platform decking is constructed of plywood/particle board. Accumulated product of less than 5 gallons found on platform structure. DEC was informed this structure is owned by Con Edison. Tishman directed to retain an environmental contractor and perform the following: 1. Manually wipe steel deck on 6th floor 2. Manually wipe the loading platform on 3rd floor. 3. Set up temporary decon station and pressure wash impacted vehicles and equipment. Collecting all wash water for proper disposal. 4. Perform dig out of impacted soils/stone in area inside of construction fencing, south side of Barclay. 5. Provide disposal manifests for liquids and solids removed as part of clean-up. 6. Remove and dispose of contaminated lumber from 3rd floor loading platform. No specific time frame established for this task. 7. Keep the department informed of project status. 1/26/04 TJD Site reinspected. Spill impacts cleaned to satisfaction of DEC. Disposal manifests submitted. 2/4/04 TJD File containing disposal manifests missing. No further action required. Spill closed."

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL WTC BUILDING #7 COLLAPSE CAUSED THE RELEASE OF APPROXIMATELY 130,000 GALLONS OF COMBINED TRANSFORMER OIL AND CABLE OIL. THE TRANSFORMER OIL WAS FORMERLY LOCATED IN 10 TRANSFORMERS WHICH WERE THE MAIN COMPONENTS OF AN ELECTERICAL SUBSTATION DESTROYED IN THE COLLAPSE OF 7 WTC. THE CABLE OIL WAS LOST FROM UNDERGROUND FEEDER CABLES WHICH WERE ALSO DAMAGED IN THE COLLAPSE. CON EDISON, THE OWNER OF THE SUBSTATION, IS PERFORMING A SUB SURFACE INVESTIGATION TO DELINEATE THE EXTENT OF SUBSURFACE SOIL CONTAMINATION AND ANY GROUNDWATER CONTAMINATION. THE INVESTIGATION INCLUDES THE INSTALLATION OF GROUNDWATER MONITORING WELLS AROUND THE PERIMETER OF THE SITE AND THE COLLECTION AND ANALYSIS OF SOIL AND GROUNDWATER SAMPLES. 10/26/03 SEASONS CONTRACTING (A SUBCONTRACTOR TO TISHMAN CONSTRUCTION CORP) WAS EXCAVATING AND ENCOUNTERED AND RECOVERED AN ADDITIONAL 2208 GALLONS OF DIELECTRIC OIL (TRANSFORMER OIL) FROM A SERIES OF CON ED VAULTS ON THE EAST SIDE OF THE FORMER 7WTC PROPERTY (ADJACENT TO THE WEST WALL OF THE TRUCK RAMP TO WTC). THE MATERIAL WAS TRANSPORTED TO CLEAN VENTURE FOR DISPOSAL. E2MIS 139420 9/11/01 19:50 hrs. Harry Coates #74415, Section Mgr. E,H&S reported to W. Lee #33243 at 19:26 hrs. the potential release of asbestos and transformer oil to the environment due to the World Trade Center contingency. Mr. Coates was making this report for Substation Operations. The asbestos and transformer oil release was from transformers located in the Trade Center Substation No. 1 & 2 and possibly from network protectors located in distribution transformer vaults. The cause was from fire and equipment damage due to the WTC contingency. It is not known at this time how much asbestos and transformer oil was released. There was fire involved. It is not known if sewer or waterway was affected. The following private property was affected: buildings, vehicles, property and personal articles. The substance was spilled on concrete, asphalt, bluestone, soil, water, people and unknown at this time. There was oil filled equipment in the structures. Sewer connections cannot be verified at this time. No samples taken at this time. No initial cleanup action taken. Cleanup pending investigation and safe access. CIG Bill Murphy #76378 notified at 19:45 hrs. Note: This incident was recorded by W. Lee #33243 and logged by Updated CIG Sean McKeever #15523 at 21:06 hrs. R. Pellegrino #38620 Update 9-12-01 @ 01:40 . H Coates reports that there is fs6 gas in the circuit switchs and the automatic ground switchs, also potential pcb's in the oil. CIG S McKeever #15523 notified @ 23:43 (update could not be inputted at time of report due to e2mis system was down) Update 9-12-01 @ 07:35 . D Connelly #80483 reports that 2000 gallons of dielectric fluid has leaked based on the tank levels of dielectric feeders. CIG J Fox notified @ 07:46

WORLD TRADE CENTER B-7 (Continued) **S105142165**

9-12-01, 08:15 Updates were made concerning the 2,000 gallons to NRC, DEC, DEP, and FDNY Marine agency hotlines. Jane O'Connell was left a message. Second notifications were made concerning th initial potential oil release from the substation. 9-12-01, 08:56 At 08:47 Dennis Connelly called to ensure FDNY was notified of potential PCB in dielectric fluid. Called Fire Fighter Tanzman at FDBCO, and notified him of 30,000 gallons of dielectric fluid with possible PCBs in the oil, asbestos, and SF6 gas. Called Bill Wallace who will be going to the location, and he will re-notify the FDNY personnel on-location. 9-12-01, 08:48 J. Fox of CIG notified DEP RTK of RQ release of asbestos, and potential RQ of PCBs. 9/13/01 12:16 - update provided by Joe Susco, EHS Manager Substation Operations: There are 9 transformers in the station, containing about 100,000 gallons of transformer oil and containing other oil filled components, such as bushings. The amount of asbestos containing materials in the station is not known, but can include wiring, arc proof tape, transite board and other materials. This station also has one dielectric fluid pumphouse containing a 7500 gallon tank and oil filled piping. There are also five 138kv oil filled feeders entering the station. Feeder oil is composed of 75% or greater alkylbenzene derivatives. There are also six capacitor banks in the station containing a total of about 3600 gallons of capacitor oil. In addition to oil, this station contains lead-acid batteries and Sulfur Hexafluoride gas filled switches. The total amount of sulfuric acid (30% concentration) is approximately 390 gallons and the amount of SF6 gas is about 220 pounds. The station also stored or used a small amount of gasoline (up to 100 lbs), compressed nitrogen (up to 1,000 lbs) and pcb containing waste (up to 100 lbs). These amounts were obtained from the 2001 SARA report. As per e-mail request from Stu Hanebuth 9/13/01 @ 7:17 PM The PCB Concentration for Main Bodies, Selectors, and Contactors of Transformers 1 through 9 range from <1 ppm to 10 ppm PCB. LSNs 99-01699, 98-14358, 98-11164, 95-08792. There may be other components of these transformers that contains PCBs in excess of 50 PPM PCBs, but they cannot be sampled at this time due to the building collapse on top of the substation. 9/14/01 update provided by Joe Susco: The oil from the capacitor banks (containing large capacitors) and the oil from the feeders/pumphouse has a PCB concentration of <1ppm. 21:50********** I added the remaining substances discussed in the 9/13/01 (12:16) update by Joe Susco into the Event Involved Material History (Capacitor Oil; Dielectric Fluid; Gasoline; Compresed Nitrogen; Sulfuric Acid; Sulfur Hexafluroide and Waste containing PCB) so that the detailed description and the Event Involved History are consistent. This was done for, and approved by Joe Susco on 9/17 (@ 10:50 Sep.22,01 15:37 hrs In V1678 F/O 140 Barclay st at 15:37 was a fire No relase of transformer oil Only damaged hammer heads. Logger F.Curtis #380778 NOTE: The above information entered on Sept. 22, 2001 at 15:37 hrs. was not related to the incident at the Trade Center Substation which is the worksite for this incident. The incident in vault V1678 at 140 Broadway was not an environmental incident since it did not involve a release of oil. This information was requested to be inputted by the ERT, Dan Shah. e2MIS report number 139448 dated September 14, 2001 indicates that there was a presence of oil on the street (Less than 20 gallons) on Barclay Street, in front of the former substation. That oil may have been assocaited with the release due to the collapse of Trade Center #7. On October 15, 2001 Jane O'Connell from the NYSDEC contacted S.

WORLD TRADE CENTER B-7 (Continued) **S105142165**

Hanebuth (85259) and stated that there was oil entering the second subbasement of the Verizon Building located at the corner of Washington and Barclay Streets in Manhattan. She stated that she would like to take samples and have the oil analyzed for PCBs as well and Oil ID. The results of the analysis are attached below. MATRIX: WATER GRAB DESCRIPTION: VERIZON BLD - B-LEVEL DRUM SEPARATOR LOCATION: 140 WEST ST Analysis indicates the presence of a substance similar to a dielectric fluid. The closest match is 10-C transformer oil. PCB Analysis by EPA 608/8082 Aroclor 1242 < 1.0 ppm EPA 608/8082 Aroclor 1254 < 1.0 ppm EPA 608/8082 Aroclor 1248 < 1.0 ppm EPA 608/8082 Aroclor 1260 < 1.0 ppm EPA 608/8082 *S. Hanebuth met with Jane O'Connell on October 25, 2001 at the site of the former substation. Jane indicated that oil was present in two of the elevator shafts which were located outside of the substation, and that serviced 7 World Trade Center. Jane sampled the oil from one of the shafts and was going to have the sample analyzed, she also stated that EPA was going to have their contractor pump the oil from the shafts. Due to the demolition work at the time of the visit Hanebuth was unable to inspect the shafts. The site has been cleared to below grade. Spoke with Walter Murray of Turner Construction (646-879-0997) at approx 0745 hours 11-NOV-2001 . He stated that there was no fluid found in the equipment which was removed from the substation during the demolition. As stated above the site has been cleared to the ground and there is no equipment left on the site. The following material quantities were reported in the 60 Day oil spill report. Transformer oil - 100,105 gallons Capacitor Banks - 3,600 gallons Dielectric Fluid - up to 22,600 gallons (2,000 from the Farragut tank, 5,300 from the Trade Center Substation tank and up to 15,300 gallons from the feeder pipe) Sulfuric Acid - 652 Lbs or 388.6 gallons (30% conc) Citri Solve - 30 Lbs Esterline Angus Ink G110RMS - 1 Lb Gasoline - 40 Lbs KC Contact Cleaner - 10 Lbs Nitrogen, Compressed - 650 Lbs Various Enamal Paints - 170 Lbs Penwet 6450 - 8 Lbs Sulfur Hexaflouride 350 Lbs Universal Waste Lamps, and Nickel-Cadmium Batteries Fluids contained in a personal car parked in the loading bay (may have included oil, gasoline, antifreeze and sulfuric acid) Unknown amount of PACM from wiring, arc proof tape, transite board and other materials Small components and bushings which MAY contain PCBs. Below is an updated inventory listing of the equipment which was in the Substation: Data format is as follows: Component description, Number per Transformer, Total Volume, PCB Concentration (PPM unless Noted), Aroclor, LSN, Source of Data, Comments. Boxes); 9 transformers, 102,793 gallons Bushings, 63 units, 270 gallons High Pressure Dielectric System, 5 feeders and fluid in associated tanks, 22,600 Capacitor Banks, 1224 Cans, 3, 672 Total volume, 129,416 (Bushing volumes are sstimated (Primary Bushings 7 gallons each, secondary/neutral bushings 3 gallons each) A review of the station drum log indicates that there was no PCB hazardous waste in the station at the time of the collapse. 2 drums contianing 114ppm PCBs were picked up on September 10, 2001, manifest Number NYE0524079, the drum numbers were 01-301-132 which was a 5 gallon container (12kg) of PCB oil from TR #1 gearbox and 01-301-133 which was a 5 gallon container (20kg) of PCB oily debris from the same source. The 2000 SARA filing (which was incorrectly referenced above as the 2001 SARA Filing on 9/13/2001) did indicate that 100 pounds of PCB waste (>50ppm) was in the station at various time during the calendar year 2000, that waste was removed during the course of the year 2000, and was not present in the station at the time of the collapse. Update from A. Meyrowitz - 87986, Remediation Engineer, Con Edison Remediaiton Department. From: Meyrowitz, Allison Sent: Thursday, December 27, 2001 4:13 PM To: Hanebuth, Stuart Subject: FW: e2MIS From 12/10/01 through 12/17/01, six 6 groundwater monitoring wells were installed within the building footprint of 7WTC. The locations of the wells are as follows: MW-3 is installed at the southeast corner of the former substation footprint. MW-4 is installed between Con Edison manholes M61023 and M61026. MW-6 is installed within former transformer vault #8 along the northern border of the property. MW-7 is installed within former transformer vault #6 at the northeastern corner of the building footprint. MW-9 is installed within former transformer vault #3 along the northern border of the property. MW-10 was installed within former transformer vault #9 at the northwest corner of the building footprint. All of the soil and groundwater samples collected during the monitoring well installation contained less than 1 ppm of PCBs. Approximately 1 inch of free product was detected in MW-7. An oil sheen was detected in MW- 3 and MW-10. Con Edison was unable to secure an access agreement with Silverstein Properties to install a well at the proposed MW-5 location (at the southwest corner of the building footprint). Therefore, due to the free product detected within Verizon's trenches along Washington Street and Vesey Street, Con Edison attempted toM relocate MW-5 to two different locations within the trenches. At both locations (intersection of Vesey & Washington; and along Washington Street) refusal was encountered and Con Edison was unable to complete the installation of MW-5. Oil samples have been collected periodically from within Verizon's trenches along Vesey, Washington, & Barclay. All of the PCB sample results from the Verizon trenches have been less than 10 ppm of PCBs (the majority of which have Mbeen <1ppm of PCBs). One sample collected in the 7WTC West Elevator pit contained 10 ppm of PCBs. I was informed on 1/13/2002 that a location for MW #5 was found near the interesection of Vesey and Washington street. Below is a clarification on the sulfuric acid contained in the batteries: 388.6 is the total gallon solution - 58+58 = 116 cells @ 3.35 gals. of solution = 3953.927 or 3954 total pounds of solution (116 Cells X 3.35 Gallons/Cell X 1.22 [Spec gravity] X 8.32 lbs/gallon of water) Update 5-17-02 @ 06:40 hrs. M Thompson # 85204 reports that he discovered 3 gallons of an unknown oil in an excavation on the e/s washington st. 150' s/o barcalay st. This site is adjacent to the former site of trade center sub station 5/17/2002 @ 20:40 HRS Lab results for Lab sequence # 02-04446-001 Date

Approved, received and sampled - 5/17/2002 Oil Identification Analysis by NYSDOH 310-13 (Hydrocarbon Scan) MATRIX: LIQUID GRAB LOCATION: 5'N/O M61021 WASHINGTON ST BTW BARCLAY ST & VESEY ST STRUCTURE: MANHOLE 61021 FEEDER ID: Analysis indicates the presence of a substance similar to a lubricating oil. 5/17/2002 @ 21:00 HRS Lab results for Lab sequence # 02-04445-001 Date Approved, received and sampled - 5/17/2002 Aroclor 1242 < 1.0 ppm EPA 608/8082 Aroclor 1254 < 1.0 ppm EPA 608/8082 Aroclor 1248 < 1.0 ppm EPA 608/8082 Aroclor 1260 < 1.0 ppm EPA 608/8082 TOTAL PCB - < 1.0 PPM UPDATE: 5/21/02 @ 19:26 hrs. Refer to Incident #142912 in MEDS Start time: 5/12/02 @ 13:15 hrs. On 5/21 @ 13:32, J Frawley # 49541 of Construction Mgt. reported to Colon # 48364 that he discovered approx. one gallon of unknown oil and 4 gallons of water in a mixture of dirt in M-61066. No sewer/waterway can be verified as affected at this time, no injuries related to this spill, no weather conditions contributed, no private property affected. No fire or smoke was involved. The source and the cause of the spill is the WTC disaster. The standing water is not moving, no substantial cracks seen, but one wall is missing. Sewr connection and sumps are not verified and no sump is heard running. Frawley is to notify Chem Lab to take the required samples. No cleanup action was taken at this time. 5/21/02 14:55 HRS Notified CIG, spoke to McGuire # 61959 @ 14:48 hrs. Logger: R. Pellegrino #38620 UPDATE: 05/24/02 00:11 HRS. S/S BARCLAY ST 30' W/O GREENWICH ST Reported to W.Lee #33243 at 00:11 hrs. Reported by M.Catricola #17297 const mgnt. @23:30 hrs M.Catricola #17297 found 1 pt of dielectric in open excavation. Leaking from split in pipe Spill on: soil No private property affected, No waterway/sewer affected, No injuries related to spill, No weather conditions contrubute to hazard of spill. Sample to be taken by chem-lab. UPDATE: 6/10/02 Joe Brenner #53926, Construction Mgmt., reported to Manh. Envir. Desk at 14:00 hrs. that he found at 13:50 hrs. a mixture of oil & water in Transmission Operations manhole M61021 and in the trench north of this manhole and south of this manhole. The two trenches and manhole are located east side of Washington Street 90 feet south of Barclay Street. North of the manhole is a 30 ft. trench and south of the manhole is a 20 ft. trench. The manhole is approx. 20 ft. long, so there is approx. 70 linear feet of oil & water mix. Construction Mgmt. was excavating for the installation of new oil-o-static lines when they discovered the spill. There was approx. one gallon of unknown oil and approx. 100 gallons of water found in the manhole. There are approx. two gallons of unknown oil and approx. 200 gallons of water found in each trench. Note: These three separate incidents are merged into the same report since the manhole is connected to both trenches (north & south of it). The source and cause of the spill is unknown. The manhole is at the water table level and below the sewer lines. No private property affected. 1/15/04 Reviewed Closure Report submitted by Langan Engineering & Environmental Services, 21 Penn Plaza, 360 W31st St., Suite 900, NY NY 10001 dated January 2004. Construction for the new 7WTC building began in May 2002. Total of 51,791 tons of petroleum contaminated soil,3308 gallons of oil and oily water, 8 drums of solid waste removed during new building foundation construction. No tested soils were designated as hazardous. Excavated to approx 25 ft below grade No free product encountered during dewatering activities. Endpoint samples collected in areas previously identified as hot spots. Spill closed. Rommelh "

Remarks: "DUE TO COLLAPSE OF WORLD TRADE CENTER ASBESTOS AND TRANSFORMER OIL WAS RELEASED FROM CON ED BLDG #7 AT WORLD TRADE TOWER."

DEC Memo: "05/03/07 - See e-docs for Con Ed report detailing cleanup and closure. 162131. J Knipper# 51005, I&A Splicer reports at 17:40 hrs, that while preforming a high risk visual inspection in Vlt 9105 at 32 Harrison St, he discovered aprox 3 gals of oil mixed with soil on floor of vlt. He was working under acct. f3275. He also reports that the north wall of the vlt is crumbling and he can not be sure of the status of the floor. No smoke or fire was involved and no water ways or sewers were affected. No injuries were reported and weather did not contribute to this spill. There is oil filled equipment in the vlt (transformer). The sump pump was found unplugged. There is a sewer connection and a concrete sump.Soil samples were taken and yellow tag # 38867 was hung. samples given to currier with chain of custody form # EE04111. No initial clean up actions were taken at

VAULT #9105 (Continued) **S107488866**

this time . This will not be a 72 hr. due to need of feeder outage to clean. LOGGED BY : G. Anelli # 14059 UPDATE: 12/05/05 @ 18:39. J Knipper # 51005 reports that he checked the trap for the sump pump he found no oil. Logged By : G. Anelli # 14059"

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL Con Ed e2mis #137146: This incident was origianlly entered under the incorrect site (137146). A duplicate report has been generated under the correct site (137314). The notification information will remain in the original report. On 5/17/01 at 09:39 R. Groccia # 16721 of substation operations reports that he had found 1 oz. of dielectric fluid had leaked from a pressure switch onto bluestone. This was on the C phase, at the Trade Center # 1 substation. He had found this at 09:49 & he will start the cleanup as soon as he is done calling this in. He called back at 10:19 & reported that the cleanup was complete, and he put down marrige roll , a drip pan, and socks to catch further leaks. He says that it is leaking at a rate of 1 drop per day. He had checked with Tom Wipple substation specialist who said that all 138kv feeders on non- PCB. He hung a tag #S-01359 & will put in a request for repairs which will have to be done when the equiptment can be deenergized. TO crew reported to location and tightened up weeping union above Barksdale switch. No outage was required. All work performed below pothead rack. Piping was wiped down and cleaned off. Repair work was completed on 6/29/01. Station Destroyed on 9-11-01. See incident # 139420. All equipment removed."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

SPILL NUMBER 0209273 (Continued) **S106009891**

DEMEO 12/9/02 - AUSTIN, SUBBING AS DDO - SPOKE WITH JOHN CURRAN, ATTORNEY FOR THE ISSEY MIYAKE CLOTHING STORE, A TENANT OF 117-119 HUDSON, AKA 50 N. MOORE ST. - HE SAID THAT A TANK OVERFILL OCCURRED ON 12/7 (SATURDAY), SPILLING FROM THE TANK'S BUNG HOLE INTO THE TANK'S VAULT, AND ALSO SPILLING IN A WALL FROM THE VENT LINE, WHICH APPARENTLY HAD A 6 ' SECTION OF IT CUT TO ACCOMODATE THIS ALUM. STUD AND WALLBOARD WALL. SOMEONE HAD DONE A PARTIAL CLEAN UP, BUT THERE WAS STILL RESIDUAL PRODUCT AND ODORS IN THE SUB-BASEMENT WHERE THE TANK RESIDES. ODORS FROM THE SPILL HAD SEEPED INTO BOTH THE BASEMENT AND FIRST FLOOR, WHERE THE STORE EXISTS. THE TENANT ARRANGED FOR THE CONTAMINATED WALL TO BE REMOVED AND THE AREA CLEANED, AND FANS WERE BROUGHT IN TO VENT THE AREA. THE SITUATION AS OF 12/9 PM, ACCORDING TO MR. CURRAN, IS THAT THERE ARE SOME RESIDUAL VAPORS IN THE STORE (UNK. ABOUT IMPACT TO THE REST OF THE BUILDING - SPILL WAS REMOTE FROM ELEVATOR SHAFT), AND HE INDICATED THAT IMMEDIATE RESPONSE WAS UNNECESSARY. A SEARCH OF THE SPILLS DATABASE SHOWS NO SPILLS CALLED IN FOR EITHER ADDRESS SPECIFIED FOR THIS LOCATION, NOR ANY PBS REGISTRATION. MR. CURRAN ALLEGED THAT TANK CAP. WAS 3500 GALS. ACCORDING TO MR. CURRAN, THE LANDLORD LISTED ON HIS CLIENT'S LEASE IS: BLF REALTY HOLDING CORP., 146 OLD COUNTRY ROAD, MINEOLA, NY 11501. THE CONTACT IS WILLIAM FLEISCHER, 516-739-3986. SPILL NEEDS FOLLOW UP BY FDO (DEMEO) TO DIRECTLY ASCERTAIN IF SPILL CLEANUP WAS COMPLETED, TO ASCERTAIN WHO THE DELIVERY COMPANY WAS, AND, IF THE TANK IS >1100 GALS., TO SEEK PBS ENFORCEMENT AND HAVE THE VENT LINE REPAIRED PROPERLY. 12/11/02 TJD Left message for Bill Fleisher (BLF Realty Group) @516 739 3988. 12/13/02 TJD Left 2nd message for Bill Fleisher. 12/13/2002 TIPPLE VISITED SITE WHEN SPILL# 0209418 WAS CALLED IN BY CLARK CONSTRUCTION, SECOND FLOOR TENNANT. OLFACTORY EVIDANCE OF PETROLEUM IN WORKSPACE. BASEMENT HAS BEEN TOPICALLY CLEANED. WORK IS STILL ONGOING. 3/10/03. J.Krimgold responded to a spill (0212088) at this location. Observed tank overfill thru the vent pipe to the sidewalk and to the street running to the city sewers. Trade-Winds was hired by the landlord Bill Flaisher to do the cleanup. Also spoke to tenants who complained about strong diesel-like odor in the basement and first floor. Inspection inside the building revealed remnants of previous spill (0209273) which have not been cleaned up properly. Oil probably reached areas between walls and on the top of old boiler and old oil tank. Trade-Winds was hired by the landlord to investigate area of contamination and perform cleanup. 6/21/04 TJD Spill cleaned in conjunction with two other spills, 0209418 & 0212088. Trade-Winds Environmental performed the work. Site inspected by Tipple & Krimgold on seperate occassions. Spill impacts were appropriately remediaited. No further action required. Spill Closed."

Remarks: "attny of the retail client called to report spill - unk if it was previously reported - spill appears to have been an overfill or a problem with the fill pipe - the spill has been cleaned up at this time - spill was in the basement "

DEC Region: 2
DER Facility ID: 471756
DEC Memo: "11/27/15-Zhune spoke to Gregg Collans from GC Environmental (516-680-6348). Gregg said the tank failed the test with a ullage leak. The tank is a 40,000 gallons, double wall fiberglass tank. Assuming gauge is the problem. Next week they will change the gauge and retest the tank. 11/30/15-TTF letter sent to: Ms. Debby Doland Stellar Management 80 North Moore Street New York, NY 10013 12/10/15-Hiralkumar Patel. alternate addresses: 308-378 Greenwich Street, 80 North Moore Street, 34-40 Harrison St, 43-55 Harrison St no PBS record found. other spills #: 0212230, 1402204 spill # 0212230 was reported on 03/12/2003 due to findings of 3 gal of unknown product in coned manhole. case closed. spill # 1402204 was reported on 05/30/2014 as 20 gal hydraulic oil spilled on street and sidewalk due to broken hose on vehicle. case closed. IP Mortgage Borrower LLC. **property owner** c/o Stellar Management 156 William Street, 10th Floor New York, NY 10038 Attn.: Deborah Dolan **property manager** Ph. (212) 962-3530/1705 email: ddolan@stellarmanagement.com 10:12 AM:- spoke with Greg. they found leak at three locations on the 40,000 gal tank system: coupling on a remote fill line, coupling on a direct fill line and mechanical petrometer gauge. Greg mentioned that both leaking couplings on fill lines were within spill containment boxes and faulty petrometer was within tank top sump. after disconnecting faulty couplings and petrometer gauge, the remaining tank system (including remaining length of remote fill and direct fill lines, supply/return/vent lines) was tested tight last week. Greg mentioned that they have applied for NYC DOT sidewalk permit for repair of the faulty remote fill line. they will replace the spill containment box and any associated contamination. a new electronic gauge will be installed to replace faulty mechanical gauge. asked Greg to submit email with work summary and copy of passing test result. also asked him to provide copy of PBS certificate as no PBS record found for the site. 11:19 AM:- left message for Ms. Dolan. 12:34 PM:- sent TTF letter, including PBS application, to Ms. Dolan. asked her to submit PBS application immediately and tank test investigation report by the end of 01/29/2016. letter emailed to Ms. Dolan and Greg. 01/14/16-Hiralkumar Patel. 12:13 PM:- received call from Greg. they investigated the direct and remote fill lines. no leaks were found from the direct fill line, but some contamination was noted under the remote fill line. they removed about two (2) drums of contaminated soil from under the sidewalk. a concrete surface was found at the bottom of the excavation. endpoint soil samples were collected, including one from soil right above the concrete surface. Greg mentioned that there were some odors in endpoint soil, but further excavation is not possible due to utilities nearby and concrete at the bottom of excavation. he has taken some pics of open excavation. he will submit final report, once endpoint sample results are available. 02/29/16-Hiralkumar Patel. received email from Fulya Toylular (at 4:10 PM on 02/26/16) from G.C. Env. including spill closure letter. the tank system was tested tight on 01/14/16 after necessary repairs. no contamination noted in endpoint sample from remote fill line excavation. PBS application has been submitted for tank system registration (PBS #: 2-612526). case closed based on available information. 10:53 AM:- sent spill closure letter to Ms. Dolan. letter emailed to Ms. Dolan and Ms. Toylular."

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001
Tank Id: 61124
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
L00 - Piping Leak Detection - None
I04 - Overfill - Product Level Gauge (A/G)
J02 - Dispenser - Suction Dispenser
C03 - Pipe Location - Aboveground/Underground Combination
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
I02 - Overfill - High Level Alarm
K01 - Spill Prevention - Catch Basin
E00 - Piping Secondary Containment - None
G02 - Tank Secondary Containment - Vault (w/access)

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 01/01/1998
Capacity Gallons: 7000
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001
Tank Id: 12878
Material Code: 0003
Common Name of Substance: #6 Fuel Oil (On-Site Consumption)

Equipment Records:

G02 - Tank Secondary Containment - Vault (w/access)
I05 - Overfill - Vent Whistle
L02 - Piping Leak Detection - Interstitial - Manual Monitoring
H02 - Tank Leak Detection - Interstitial - Manual Monitoring
J01 - Dispenser - Pressurized Dispenser
D02 - Pipe Type - Galvanized Steel
F00 - Pipe External Protection - None
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
K99 - Spill Prevention - Other
C02 - Pipe Location - Underground/On-ground

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 03/05/1978
Capacity Gallons: 6000
Tightness Test Method: -
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported

DEC Memo:	"2/22/05 Tipple and Rahman responded, sidewalk spill, small amt down vaulted area along fill line. Island tank began cleaning spill, not completed, more work required . 3/10/05 Island tank not quite finished as per conversation with Vinny L.////// 1/5/06 - Raphael Ketani. I spoke to Phil Filvergalte of Petroleum Services (201) 206-1185. He said the guage had been repaired and the spilled oil cleaned up. He said there was no leakage below the concrete and no impact to drains. I told him to send me a letter to this effect. 1/6/06 - Raphael Ketani. I received the letter from Petroleum Services stating that the spill was cleaned up, the guage repaired, and that there were no impacts to sewers or the environment. I am closing the case based on this letter."
Remarks:	"SPILL DUE TO FAULTY GAUGE ON INSIDE BASEMENT TANK THAT OCCURRED DURING FUEL OIL DELIVERY. TRI STATE ENVIRONMENTAL TO BE CONTACTED FOR CLEAN-UP."

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

MTA NYCT - PEARL STREET PUMP ROOM 3173 (Continued) **1017400671**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
