

Travel Advisory

South Battery Park City Resiliency Project

Starting Monday, March 17, Con Edison will begin trenching and installing new utility infrastructure along Battery Place, between First Place and Little West Street (shown in orange on the map). This work is necessary to establish electrical service to the new Wagner Park Pavilion. At times, traffic will be reduced to a single lane, with flaggers alternating the flow in each direction. The work hours will be weekdays from 9AM to 4PM, with work expected to continue through March 21, subject to weather and subsurface conditions.

The South Battery Park City Resiliency Project (SBPCR) represents one of several projects within the overall Lower Manhattan Coastal Resiliency (LMCR) Master Plan. SBPCR is a BPCA capital project designed to provide flood risk reduction for Battery Park City and Lower Manhattan in response to increasingly frequent and more severe storms. More information about SBPCR can be found at <https://bpca.ny.gov/sbpcrp/>.
